Location Map

Lift Stations 288 and 1151 primarily serve the Corpus Christi Army Depot, the largest tenant on Naval Air Station Corpus Christi. These lift stations are currently listed as critical facilities for Continuity of Operations.

Lift Station 288 – Underground storage of domestic wastewater from Corpus Christi Army Depot and several Naval Air Station Corpus Christi tenant command buildings.

Lift Station 288 was built in 1978. It contains two submersible grinder pumps. Only one of the pumps is functioning. Its capacity is one million gallons per day (1 MGD).

Lift Station 1151 was built in 1944. Its capacity is one million gallons per day (1 MGD).

Lift Station 1151 – only one pump is hooked up and operational. handles industrial waste from CCAD Building 8, Building 340 and other CCAD industrial facilities.

Pump #1

Pump #2

Industrial chemicals used for solvents and metallurgy operations are pre-processed in the CCAD complex, then are pumped by Lift Station 1151 to the NASCC WWTP for final processing.
