New Use Is Found For Corn Syrup

Experiments Take
Place in New York
Laboratories

GENEVA, N. Y. (UP)—Experiments carried on in the dairy laboratory of the New York State Agricultural station here indicate that corn sugar or syrup may replace approximately one-fourth of the cane sugar now used in the manufacture of ice cream, ices and sherbets.

In a bulletin describing the experiments, Dr. A. C. Dahlberg said the most satisfactory results were obtained with ice cream when 25 per cent of the sucrose or cane sugar was replaced by corn sweeteners.

STREAMLINING THE LADIES

Among the ladies there is a great trend toward bowling because it slenderizes one so quickly and effectively. A pleasant and quite dependable way to get rid of extra poundage. It rolls weight off the stomach and peps up the whole physical condition. Slim girls take up bowling because it is fun and because it makes them feel fit. It relieves the nervous tension piled up during a hard day at the office and promotes congeniality.

Sign of Trouble

Has your family sedan started to develop a sports car "rap"? Instead of taking it to Watkins Glen or Lemans, better check your exhaust system. That deep-throated roar under the chassis undoubtedly means your exhaust system is defective.

Not only might it earn you a traffic ticket for making too much noise but it could mean a death sentence for you and your family. A leaky exhaust is a potential source to lethal carbon monoxide.

When you hear a noisy exhaust, head straight for your favorite service outlet. Better yet, have a mechanic check your exhaust system next time your car is on the hoist.
