Analysis & Recommendation

The proposed rezoning is inconsistent with the City of Corpus Christi Comprehensive Plan and future land use designation of medium-density residential.

- Staff considered the inconsistencies to the guiding documents, the combined effect of floodway prohibitions, elevation requirements, compensatory storage needs, and stormwater management obligations, due to the location of the property within both the regulatory floodway and FEMA Flood Zone AE and has recommended a special permit that addresses the visual and operational characteristics of a warehouse with aggregate storage use.
