

Kleiss Mainline Control Stopping System

Council Presentation
February 20, 2024

Current Stopping System

Kleiss Maintain Control Stopping System

- Meets the needs of North American Natural Gas Local Distribution Companies.
- Easier to use and more effective at stopping off flow than current system.
- Works with various pipe materials and a wide range of pipe diameters.
- A unique system for each job is no longer needed.
- Creates a better seal over uneven areas than current system.
- Doesn't compromise the integrity of the pipe material- a safe alternative to squeezing plastic pipe.
