

TWDB Hydrographic Services Quote

Reservoir Name: Corpus Christi
CPE Elevation: 94 feet amsl
Reservoir Surface Area (acres): 19,748
 Source: TWDB Report (2017)

Volumetric Survey	
Base rate	\$ 51,147
5% navigational hazards fee *	\$ 2,557
Intake/Structure scans: 0	\$ -
Total volumetric survey cost	\$ 53,705

Sedimentation Survey	
Sediment data collection and analysis (base X 35%)	\$ 17,902
Coring and analysis	\$ 6,000
Total survey cost Volumetric + Sedimentation **	\$ 77,606

* Navigational hazards fee of 5% of the base rate charged for navigational obstructions (such as submerged trees and vegetation, sand bars, marinas, boat docks and piers, etc.) that delay the data collection process.

** Total survey cost = volumetric survey cost + sedimentation survey cost
