

ONSWTP Filter Media Backwash Elevated Storage Tank Rehabilitation

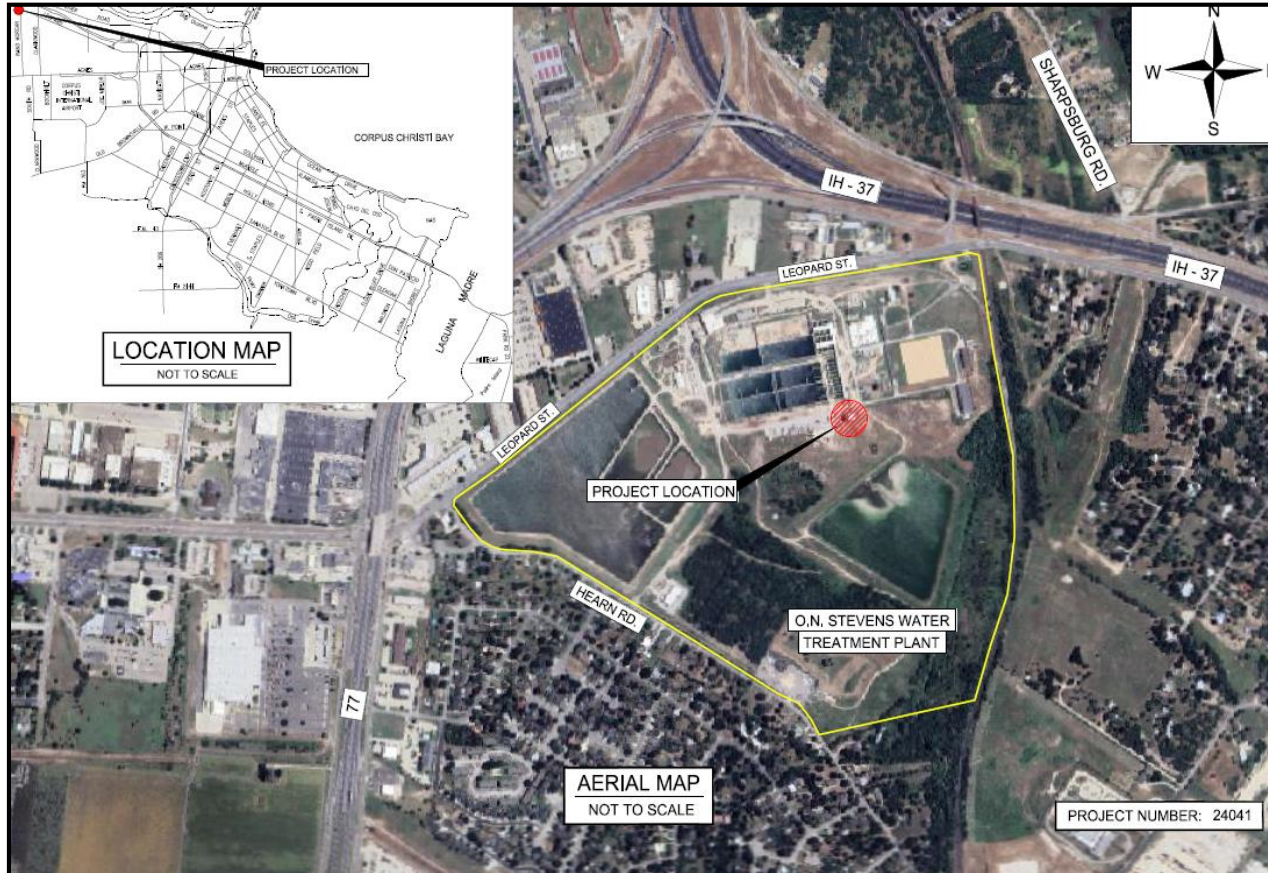

DRAFT

Nicholas Winkelmann, P.E.

Director of Water Systems and Support Services

January 14, 2025

Project Location

Scope of Work

The project scope of work includes the critical restoration and rehabilitation of the ONSWTP Filter Media Backwash elevated storage tank. The Filter Media Backwash tank is critical to maintaining filter effectiveness and overall water quality.

The scope of work includes the complete cleaning and repainting of all interior & exterior surfaces specifically including:

- Containment and Dust Collection System (Exterior Repainting)
- Dehumidification and Ventilation Equipment (Interior Repainting)
- Welding and Corrosion Related Repairs
- Perform epoxy surfacing and seam sealing work
- General Foundation Related Repairs
- Modifications to Ladders and Balcony

Project Funding and Schedule

Project funding is available through the Water Fund - O.N. Stevens Water Treatment Plant Operations and Maintenance Budget.

2024 - 2025	
Sep - Jan	Feb - July
Bid/Award	Construction
