

Fire Department Resource Center - Phase 2

Council Presentation
May 06, 2025

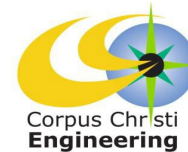

Fire Department Resource Center - Phase 2 Location

Project Scope

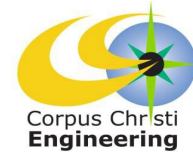

Listed below is the project scope of work:

- Construction of 7,700-squarefoot pre-engineered metal building with two-bay apparatus, space for multi-purpose room that can be used for classrooms, two office spaces, equipment storage and restrooms with limited showers for training, Fire Department's wellness program and emergency personnel.
- Site improvements with nine additional general parking spaces, and space for engine storage and emergency vehicle use

Fire Department Resource Center - Phase I Current Location

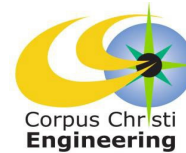

The existing Resource Center – Phase I has reached its storage capacity.

It's fully utilized by reserve apparatus and essential units such as UTVs and the water tender.

Resource Center - Phase I

Fire Department Warehouse Reserve Apparatus Parking

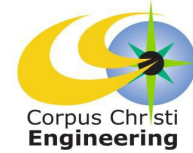

Exposing reserve apparatus outdoors to the elements diminishes their lifespan, risking the loss of valuable assets, including ambulances valued at \$385,000 per vehicle and fire trucks at \$1,200,000 per vehicle.

Fire Department Warehouse at 1501 Holly

Fire Department Warehouse Reserve Apparatus Parking

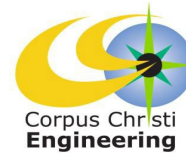

The Fire Department's efficiency in performing maintenance and repairs at the Warehouse is negatively impacted when the facility is at capacity.

Fire Department Warehouse at 1501 Holly

Fire Department Classroom Space Training Dome

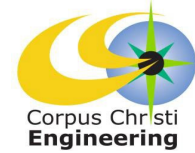

The existing classroom frequently reaches capacity during training for fire department personnel.

Limiting participation in essential professional development and hindering the expansion of necessary programs.

Training Dome at Del Mar Windward Campus at 4101 Old Brownsville

Fire Department Classroom Space Wellness Program Expansion

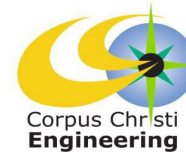

The classroom space in Resource Center Phase II is crucial for expanding our Fire Department's wellness program.

It will enable more comprehensive and consistent initiatives to support the health and well-being of our personnel.
