

N. Lexington Blvd. (Leopard St. to Hopkins Rd.)

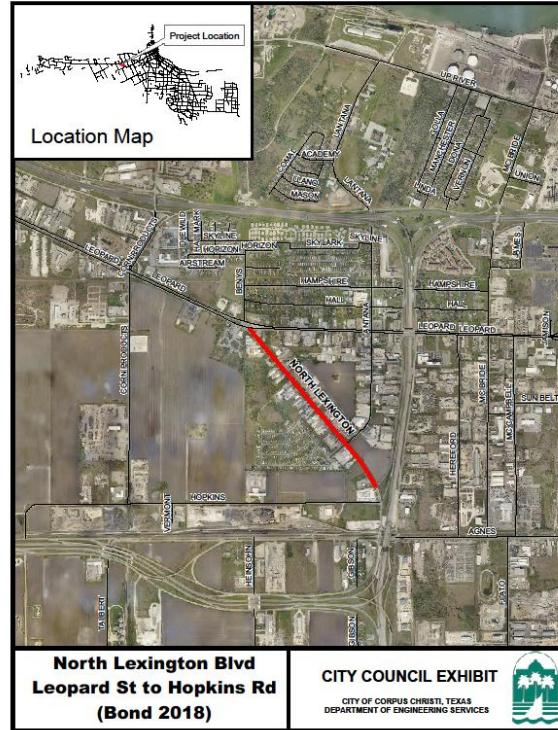

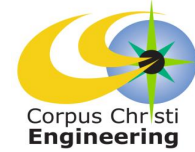

Bond 2018 - Proposition B (Streets)

Council Presentation
May 10, 2022

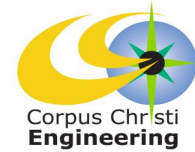

Project Location Map

Project Background

The N. Lexington Blvd. improvement is a Bond 2018, Proposition B project with available funding of \$ 4,746,010.

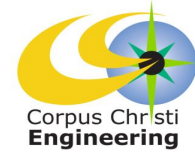

Bond language includes the reconstruction and widening of an existing two-lane roadway with new pavement, signage, pavement markings, and illumination improvements.

The professional services contract provides engineering design, bid, and construction phase support services for these services, as well as drainage improvements with new storm water culverts and utility improvements.

The proposed drainage improvements on N. Lexington Blvd will benefit the area, however, without improvements to the downstream drainage structures along Hopkins Rd. the N. Lexington Blvd. system will still flood.
