Subject: **Frio, Hacala, Dorado (Greenwood to Martin) (Bond 2018)**
City Project No.: **18019A**

Dear Jeff:

Urban Engineering has received a copy of, and reviewed all of the bids submitted for the subject project. We have also received and reviewed the information required in the Statement of Experience submitted by the three low bidders. We have found the bid packages and experience records of all three low bidders to be satisfactory. Attached please find a Bid Tabulation and copies of the Statement of Experience for each of three low bidders.

The proposal included bid alternatives. Total Base Bid A – Asphalt and Total Base Bid B – Concrete. The base bid proposals were the same with exception of street pavement section. Based upon staff criteria for lane-mile cost Base Bid A- Asphalt is the more effective alternative. The Low Base Bid A – Asphalt bid is lower than the Base Bid B – Concrete alternative with the low Base Bid A – Asphalt being 12.6% lower than the low Base Bid B – Concrete bid.

It is the recommendation of Urban Engineering that Base Bid A – Asphalt be awarded to Clark Pipeline Services for a contract total of \$4,476,609.27.

Sincerely,
URBAN ENGINEERING

Stephen L. Skrobarczyk Jr., P. E.
