

North Padre Island Seawall Restoration Project

January 27, 2026

North Padre Island Seawall CIP Project

Located along the Gulf beachfront and heavily used by residents and visitors

Serves as:

- A protective barrier for beachfront development
- A pedestrian walkway along the shoreline
- Portions of the seawall are in disrepair, including exposed rebar and structural deterioration
- The surrounding area lacks key amenities such as:
 - Benches
 - Lighting
 - Shared public-use features

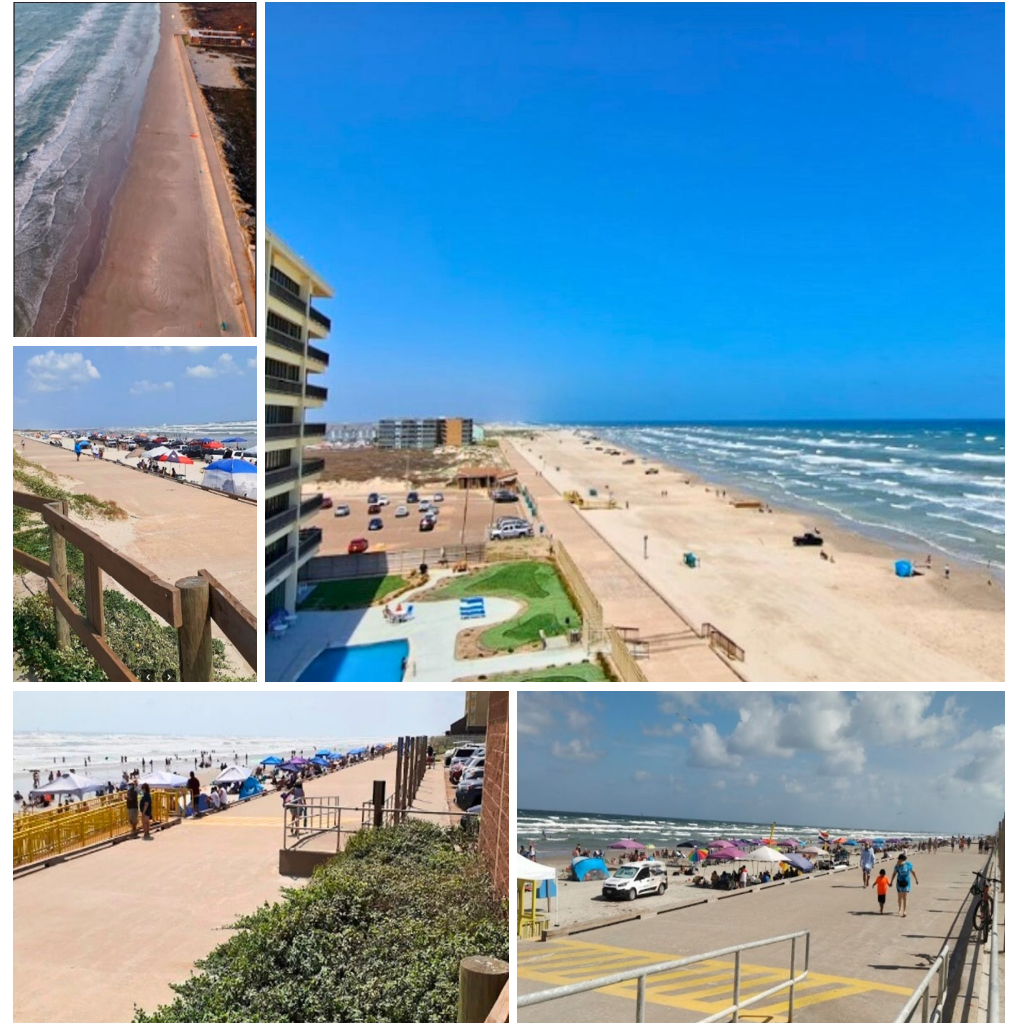

Project Goal:

Restore and enhance the seawall while improving safety, functionality, and the overall beachfront experience.

Project Status:

- Hanson is the design engineer. The project is 90% design complete.
- Project will be advertised for bids by Summer 2026.
