Less Transfer of Seawall CIP reserves			(4,500,000)		
Transfer to CIP			13,555,718		

Expiration
of 1/8 cent sales tax

FY 25 Proposed Seawall CIP Projects

Art Museum HVAC

This project consists of the installation of stand alone HVAC chiller equipment at the SEA District Facilities - Art Museum (Johnson and Legorreta Building) - currently tied to the American Bank Center (ABC) Convention Center Central Cooling Plant. Minor modifications will be required to the ABC chiller system as the other facilities are taken off-line. Due to the Legorreta Building losing chiller operation, it is recommended that the majority of HVAC systems in the overall facility be replaced.

Museum of Science and History – Improvements (Design)

The existing building was established in 1957 and has undergone several major improvements and additions, with the most recent being the Discovery Hall in 2001. The museums age, combined with the high salinity in the air and a corrosive environment, has led to elevated levels of corrosion, deterioration of masonry, paint damage, and equipment damage. Uncontrolled humidity may cause issues such as mold, mildew, wood swelling and warping. Capital improvements are necessary for the proper management of this city-owned asset and to enhance the overall customer experience. These repairs will extend the useful life of the facility.

Museum of Science and History – HVAC Systems Improvements

This project consists planning and design for the installation of stand alone HVAC chiller equipment and systems at the Corpus Christi Museum of Science and History. The museum is currently tied to the American Bank Center Convention Center(ABC) Central Cooling Plant. Modifications will be required to the ABC chiller system as the other facilities are decoupled. Identification and replacement of air handlers, piping, ducting, fan coil units, cooling towers, and other equipment that has reached the end of useful life. Construction and improvements of mechanical rooms for the new equipment. Installation of new building controls.

FY 25 Proposed Seawall CIP Projects

Boat Haul Out/Office Retail Facility

This project will provide a more adequate facility given the current and future volume of Marina tenants, the boating community and general public gathering in this centralized location. Creating a new Marina Office with the rehabilitation of the Haul Out and Retail Shop will enable the Marina to become more profitable and provide better services to our existing and future customers.

Coopers Boaters Facility

This project will provide an adequate facility for the increased volume of both tenants and the general public. Creating a new Boater's Facility with additional restrooms/showers, increasing the number of washers and dryers, upgrading the secured door access to be uniform with the other facilities and modernizing the public restrooms would increase customer satisfaction.

Dredging – People T Head

The Marina would be dredged around People's Street T-Head: around the north side near Laundries, near G and H piers. Special construction and costs might occur since it is in the water. Sustainable principles will be maximized in the design, development and construction of the project in accordance with City Ordinances and Objectives and other applicable laws and executive orders. Energy conservation and environmentally safe measures will be incorporated in this project wherever feasible, practical or required by regulation. Energy and natural resource conservation measures will be maximized in the design to the extent possible

FY 25 Proposed Seawall CIP Projects

New Peoples Boardwalk

This project is planned for a new Boardwalk for tourists, tenants and the general public. Additionally, a new concrete restaurant pad will be added for vendor /tenant. The new Boardwalk will include new wood, upgraded electrical and water utilities which will restore stability and safety to this area. The boardwalk will be useful to tenants and safe for all. This project will increase pedestrian traffic, and will maintain a safe environment for the City's visitors. The project will be planned over at two year period

Parking Lot Resurfacing – L Head

The project consists of the resurfacing, new pavement and striping of the large parking lot on Coopers L Head by the public boat ramp. The new pavement and striping will assist the public, visitors and tenants to know where parking is allowed; and assist boats entering the boat ramp area to launch their vessels

Replacement of A,BC,D & L Piers

The project consists of the dredging marina pier area and replacement of five piers, A, B, C, D and L will upgrade and greatly improve the existing aged infrastructure. This will provide modern piers and increase the volume of Marina Tenant and visiting vessel traffic to the Marina. Replacing Piers A, B, C, D & L with new materials and making upgrades to the infrastructure makes the Marina more marketable. This results in the Marina being more profitable as well as providing better amenities to our existing and future customers.

FY 25 Proposed Seawall CIP Projects

Replacement of Finger Piers - Lawrence Street T-Head

This project is planned for a new Boardwalk for tourists, tenants and the general public. Additionally, a new concrete restaurant pad will be added for vendor/tenant. The new Boardwalk will include new wood, upgraded electrical and water utilities which will restore stability and safety to this area. The boardwalk will be useful to tenants and safe for all. This project will increase pedestrian traffic, and will maintain a safe environment for the City's visitors. The project will be planned over at two year period

Floodwall Replacement of Science Museum

This project includes construction of new floodwall at Corpus Christi Museum of Science & History and bulkhead from the existing Corpus Christi Ship Channel Overlook just east of the Harbor Bridge eastward along the shoreline of the Ship Channel to the west extent of the City's existing seawall at the Art Museum of South Texas. The project limits include property owned by the City, the Port of Corpus Christi Authority (PCCA), and United States Army Corps of Engineers (USACE).

Harbor Point East Connectivity (New Project)

This project will consist of restoring /renovating the elevated platform/walkway at the Science and History Museum and to create a connection between the Water Garden and the new Port of Corpus Christi Harbor Point East project.

FY 25 Proposed Seawall CIP Projects

Seawall Capital Repairs

The Corpus Christi Seawall was originally constructed from 1939 to 1942. With initiation of the Seawall Maintenance sales and use tax, a major project was completed in 2007 (\$43.4 million) to address advanced levels of deterioration of the Seawall system. Funding levels programmed in the CIP are anticipated to address routine maintenance issues.

Breakwater Renovation Phase 2 (Marina Breakwater Assessment)

This project consist of a feasibility study and plan for the breakwater renovations. A breakwater is designed to reduce wave energies to marina facilities and vessels stored in the area such as a bay, marina or shipping channel. Once this study is completed a proposed plan will be budgeted and created to implement the renovations.

Budget Overview-Seawall Debt Service

	FY2023 Actual	FY2024 Original Budget	FY2024 Amended Budget	FY2024 Estimated Actuals	FY2025 Proposed Budget
Beginning Fund Balance	1,435,212	1,473,741	1,494,875	1,494,875	1,542,418

*** Projects in yellow are new projects for FY 25**

FY 25
Proposed
American
Bank
Center
Arena CIP
Projects

Arena Access Control Phase 3

This is phase 3 of the Access Control project. This is the final phase of adding key card access to all doors and spaces to provide proper security and access. Upon completion of project both the arena and convention center side of the American Bank Center will be updated to controlled access.

Arena Marketplace Build Out

The goal of this project is to expand area to enhance the patron experience by improving traffic flow as well as adding a Concessions Grab N Go concept for more concessions points of sale in both the Convention Center and Arena

FY 25
Proposed
American
Bank
Center
Arena CIP
Projects

Arena Exterior Improvements

This project will address Arena's South and West sides which will include removing existing landscaping, selectively demolishing 640 square feet of concrete sidewalk, removing the existing block retaining wall at the statue, excavation for new retaining walls, performing earthwork/fill/base material, constructing a 730 linear feet concrete retaining wall, replacing 640 square feet of concrete sidewalk, installing new landscaping and materials, electrical work (light fixtures, conduit, etc.), and irrigation systems.

Arena City Terrace and Suite Enhancements

This project will enclose a 2,200 square foot section of the City Terrace making it a part of the Suite concourse. The scope includes engineer stamped construction plans, the addition of a bar/lounge area to service the suite holders, Furniture Fixtures & Equipment, and the construction of a new bar in the current Club Lounge location.

FY 25

Proposed

American

Bank Center

Arena CIP

Projects

Area Deferred Life Safety Improvements

This project will consist of replacement and improvements to the mechanical systems that include the refrigerant monitoring system, water treatment system, ammonia safety pressure relief valves, electrical distribution equipment, building automation system controls, and life safety egress door hardware repairs

Arena HVAC Improvements

This project consists of replacement of the existing 1,000-ton Chillers #1 and #2, Arena dehumidification system improvements and external repairs to the building envelope to prevent leaks in the Arena.

FY 25
Proposed
American
Bank Center
Arena CIP
Projects

Arena Spot Light Platform

The project consists of building a platform for the spotlights on the North East corner of the arena so they sit at the same level as the spotlights on the South East corner of arena. Current spotlights sit on temporary staging on top of lighting booth.

New Project-Arena Fire Alarm System Upgrades

The project consists of fire alarm upgrades to meet current code requirements. Fire Alarm announcements need to play through PA system for persons in bowl seating. PA amplifiers need Emergency power.

FY 25

Proposed

American

Bank Center

Arena CIP

Projects

New Project- Arena Roof Replacement

This project consists of the removal and replacement of the existing Arena roofing system. Install new two-ply SBS Modified Bitumen Roof System with 20-year Manufacturer's Warranty for approximately 82,000 SF. Remove and reinstall ANSI/SPRI ES-1 compliant copings, incorrectly installed and failing metal copings and cast stone copings as well as failing sealant joints throughout. Provide new drain domes and abate corroded drain bodies. Repair existing roof metal deck where corroded and patch where holes are present.

New Project- Arena Rehabilitation and Improvements

The project consists of various improvements, renovations, and replacements to the level 2 of the Arena as needed to include but not limited to mechanical systems, electrical improvements, plumbing repairs, building controls, restrooms, audio and visual enhancements, improvements to suites, and network system upgrades.

Transfer to Type B - Housing	-	-	-	-	170,560
Total	1,028,718	1,125,656	1,125,656	496,376	307,820

Staff recommends utilizing the \$137,260 for capital improvement projects at Whataburger Field.

Affordable Housing

Projects	FY2024 Original Budget	FY2024 Amended Budget	FY2024 Estimated Actuals	FY2025 Proposed Budget
Fish Pond Development	500,000		-	-
The ALMA at Greenwood	160,560	160,560	-	-
Homebuyer Assistance Program	10,000	10,000	-	-
Total	670,560	170,560	-	-

Transfer to Type B Affordable Housing

\$170,560

Affordable Housing Transfer

Staff Recommendation:

Transfer the remaining uncommitted funds of \$170,560 from the Type A affordable housing fund to the Type B affordable housing fund to close out the Type A fund.

Fishpond		458,720		
Total	455,096	955,096	496,376	137,260

Whataburger Field Upgrades

Purpose:

To comply with recently amended PDL requirements to expand protective netting and to replace high-traffic pedestrian areas of original concrete identified for cracking and breakage.

Staff Recommendation:

Utilize the remaining Major Business Incentive funds of \$137,260 for fan safety and original concrete infrastructure at Whataburger Field.
