

Solid Waste Facility Complex

Council Presentation
November 15, 2022

Project Location

Project Scope

- The project scope includes conceptual design, process design, and permitting services (phase I) for a new Solid Waste Facility Complex.
- The proposed unified Solid Waste Facility Complex consists of three major projects:
 - Crew Quarters/ Administration
 - Transfer Station
 - Fleet Services Facility (Consolidated parking, fueling and collection fleets)

Mock Layout

- The 92 acres will provide enough space for the three new projects
- The new/expanded services will utilize the old Transfer Station building

Vision for New Transfer Station

The new transfer station will be state of the art and will have architectural and landscaping design elements to provide an attractive appearance from the Cross Town Expressway.

Project Schedule

2022 - 2023	2023 - 2024
November - August	August - April
Permitting	Conceptual Facility Design

Projected schedule reflects City Council award of design services in November 2022 with anticipated phase I completion by April 2024.
