

Artificial Turf for Splash Pads

Council Presentation
September 8, 2020

Scope of Work – Bill Witt Park

Install 4,085 square feet of artificial turf around the perimeter of splash pad and sidewalks. Square footage is to include two mound areas shown on provided plans.

- Parks and Recreation will be responsible for removing all organic material and organic debris for site preparation for aggregate base installation.
- Contractor will provide aggregate base and set and pack aggregate base. The area should be smooth and graded to allow for proper drainage.
- Contractor will fasten turf to pressure treated nailer boards using proper industry standard methods.
- Contractor will ensure turf is not installed over any ground level mechanical access covers leaving them inaccessible without damage to the artificial turf.
- Contractor will use proper industry standard methods to ensure all seams are properly connected and not visible.
- Envirofill will be added to turf to ensure product remains in place and increase life space of product.
- Contractor is to provide a one-year warranty of the installation and applicable factory warranty on artificial turf.
