Education, Professional and/or Community Activity (Present)

I recently graduated with a Bachelor's Degree in Environmental Science with a minor in Biology from Texas A&M University Corpus Christi. I am now currently working at Texas A&M University Corpus Christi as a part-time employee of sustainability (which was a job I was able to help create on campus through my hard work and dedication on improving the campus community gardens, the creation of the university's first compost program and creating the student led organization known as The Islander Green Team, along with many more related projects aimed at creating a more environmentally sustainable campus).

Why are you interested in serving on a City board, commission or committee?

I am interested in serving on a city committee because I would like to help make a difference in my community. I was born and raised in this city and have always noticed ways we can improve, especially in pertinence to environmental awareness and sustainable action planning/maintenance. In regards to the water resources advisory committee, I would like to share my knowledge and experience gained in protecting our surrounding waters from litter and pollution of all kinds, while educating the public on how precious our water is and how they can be apart of improving it. In regards to the tree advisory committee, I would like to share my love and knowledge of plants/trees that are known to grow well in this area (like native and subtropical varieties). Finally, in regards to the clean city advisory committee, I would like to share me knowledge of waste management skills and litter clean up experience I have gained through my years in school and working with local organizations. I am continuing to work towards creating a better recycling/composting program at Texas A&M University Corpus Christi and would love to help build partnerships within the university and the Corpus Christi community in order to keep our city and surrounding area as clean and green as possible. I realize that I may not be able to join all three committees I have applied for at once, nor do I think I have the time/effort to join all three at once. I am simply applying for the top three on my list and would really appreciate to be apart of any of the committees I applied for. I would especially like to be apart of the tree advisory committee, although I am not a certified horticulturist/landscape architect, I do have experience in growing and maintaining several community gardens in the area and have successfully grown various types of native & subtropical plant species that grow well in South Texas.
