EFFECTS OF DISABILITY STIGMA

- Social Avoidance of People With Disabilities (PWDs)
- Stereotyping of disabilities
- Discrimination in job hiring, housing, or other opportunities
- Condescension because PWDs are seen as helpless
- Blaming for their disability or receiving disability benefits
- Internalization of negative false beliefs
- Hate Crimes and Violence targeting PWDs

PWDs ARE MORE LIKELY TO BE VICTIMS OF PHYSICAL OR SEXUAL VIOLENCE THAN PEOPLE WITHOUT DISABILITIES.

Changing the Narrative

- Person First Language: Referring to the person first and disability second.
- Identity First Language: Some people see their disability as an essential part of who they are and prefer to be identified with their disability first.
- Choosing language that emphasizes what people can do instead of what they can't do is empowering. Instead of saying a person who is wheelchair-bound, say a person who uses a wheelchair.
- Empower each other by pointing out our capabilities and ability to overcome personal challenges.
