

# New Broadway Wastewater Treatment Plant

Council Presentation  
August 18, 2015

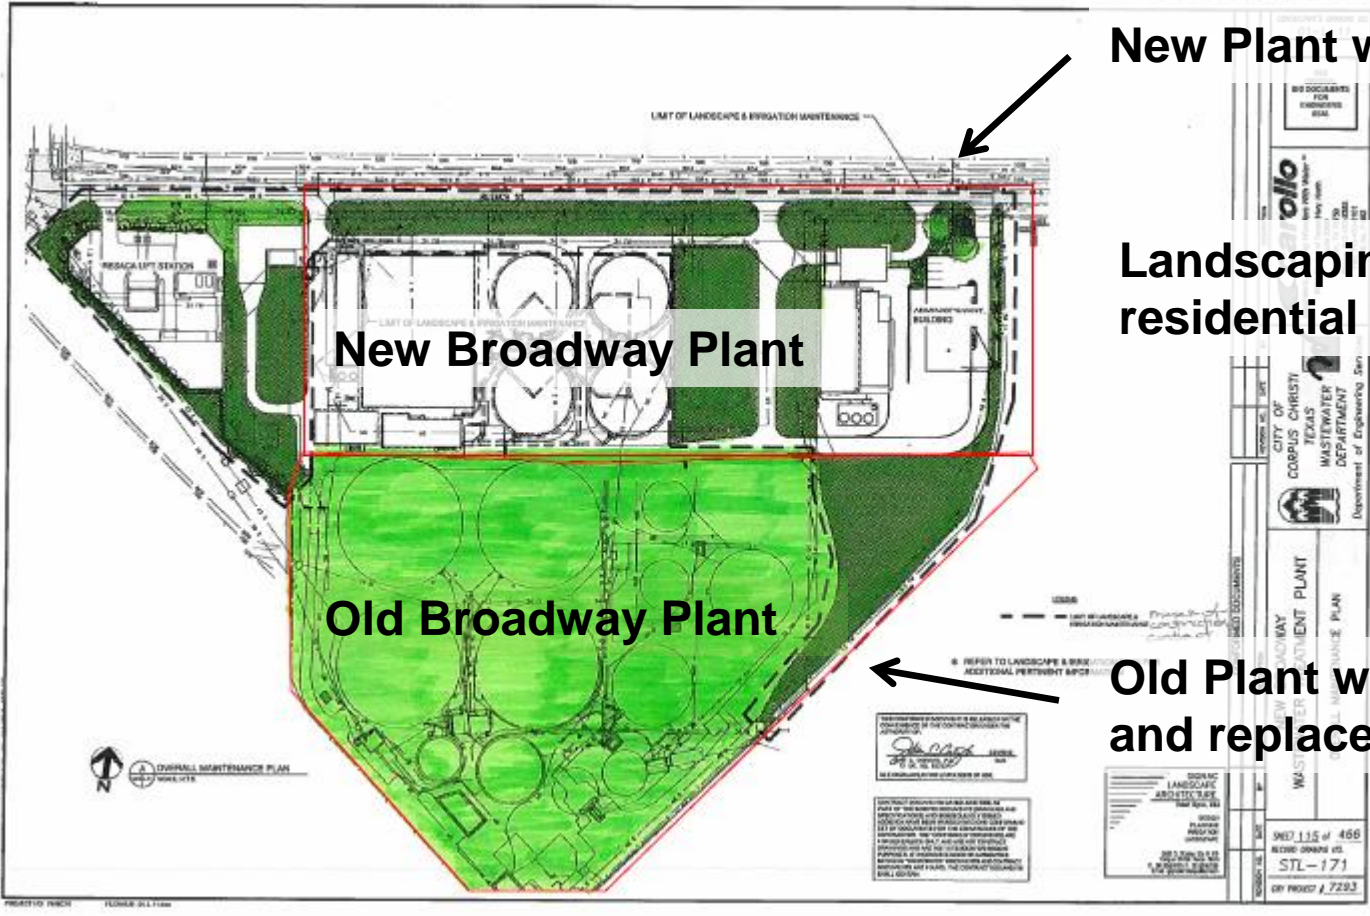

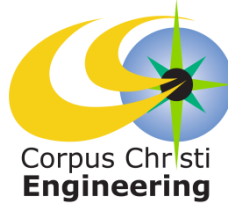

# New Broadway WWTP Progress

1. Demolish existing facility and replace with Greenspace
2. Locate new plant on the North Side of the Property
3. 150 feet setbacks other than along Resaca Drive
4. Install Odor Control
5. Landscaping and fencing requirements

# Landscaping & Greenspace Plan

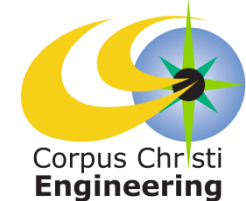

**New Plant will be enclosed**

**Landscaping on sides facing residential areas**

**Old Plant will be demolished and replaced w/ greenspace**

# Improvements to Our Facility

- Enhanced odor controls systems

**Preliminary Odor Control**

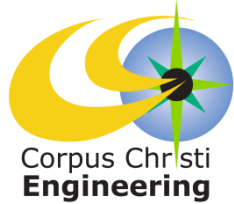

**Sludge Odor Control**

- Old Broadway Plant -- odor control not utilized on any treatment process
- New Broadway Plant -- odor control fully incorporated into overall design of plant and its treatment processes

# Perimeter Fencing

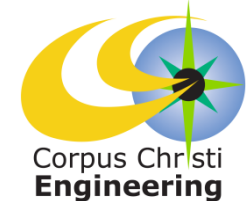

- Perimeter fencing - *portions already constructed*

- Perimeter fencing – *remaining portions are to be added to enclose the new plant*
- Landscaping – *is to be added on sides facing residential areas*

# Next Steps

- Resaca Street Landscape and Irrigation – October 2015
- Old Broadway Plant Trickling filter media removal – December 2015
- Finalize Old Broadway Plant closure per TCEQ requirements – June 2016
- Bid Demolition Contract for remainder of Old Broadway Plant – December 2016
- Demolition of Old Broadway Plant – January 2018
- Installation of perimeter fencing and final greenspace improvements – March 2018
