I am against the city moving forward with the desalination plant.
We the citizens can't afford it and we are the least consumers therefore we should not be paying for it.
I am asking that you vote no on going forward with this and use those funds on other water sources.
Please stand up for the people.
If you vote for it then at least do it right and insure that the brine will be discharged further out in the gulf and make industry pay for it.
I'm pretty sure the citizens would prefer lower water bills along with clean water versus free fans and 50\$ gas cards given away once a year in limited quantities to the first people in line.

Comment

Subject: Housing Authority deficiencies regarding implementing and enforcing livable standards at Clairelaine Gardens 1418 Arlington Dr, Corpus Christi.

Housing standards unfit for human habitation include conditions that pose risks to health and safety, such as structural issues, infestations, and lack of basic amenities like proper ventilation or sanitation. These conditions can include mold growth, pest infestations, leaks, faulty wiring, lack of heating or cooling, inadequate sanitation, and structural instability.

THE PROBLEMS

For four years, Clairelaine Gardens 1410 Arlington Dr, CC 78415 housing standards degrade as unfit for human habitation include conditions that pose risks to health and safety, such as structural issues, infestations, and lack of basic amenities like proper ventilation or sanitation. These conditions can include mold growth, pest infestations, leaks, faulty wiring, lack of heating or cooling, inadequate sanitation, and structural instability.

EXTERIOR

- Often over the past several years, the sewer drains feces, toilet paper and urine onto the lawns and sidewalk; the smell is very offensive. In these areas, the entire lawn and sidewalks are soaked in standing human wastewater. The fluids run into the city streets as well. One neighbor downstairs has two small children that live in the excrement areas which are not passable either on the grass or the sidewalks. The sewer drainage problems draw mosquitoes and cockroaches. When it rains, multiple lawns in the complex are flooded with sewer drainage. The apartment sewers draining onto the lawns, sidewalks, and street is a big health hazard. When it rains, there isn't adequate drainage and the sewer problems get worse such that residents can't access their mailbox due to the standing wastewater problem.

- Sink waste is coming out open exterior wall drains and flooding the lawns (a result of clogged pipes). Roofs have no gutters or ground drainage pipes. As such, mold and mildew is all around the outside of the buildings and walls. Overgrown grass around the buildings could hide rats and snakes. Utility lines and poles have issues.

- The screen doors do not close once opened. They have no mechanism to close. An electronic lock system was installed in the complex that fails, often. Druggies stay in the apt. hallways at night disturbing resident's sleep and leave trash or human waste. The apartment laundry facilities are forever closed for this reason.

INTERIOR

- The gas stove and wall heater pilot lights go out making them dangerous. The gas wall heaters draw air from within the room and can emit combustion products back into the same space where the heater poses health risks due to the pollutants they release, including carbon monoxide, nitrogen dioxide, and other particulate matter. Residents are afraid to sleep at night due to the gas appliance pilot lights and gas toxic emissions.

- One tiny, AC window unit works in the living area. The summer heat in the apartments is smothering. Some residents cover their interior windows with foil attempting to block the sun's unbearable heat from entering.

- The apartment plumbing in the restroom and kitchen drains are often clogged. The curtains on the windows are in disrepair and even falling down letting in the cold or heat.

- The 7 ft ceilings are uncomfortable. The interior windowsills' paint was peeling off presenting fear of old lead paint. The windows are difficult, at best, to open. Several windows simply do not open.

- The fridge and stove/oven look like antiques that belong in a museum. Everyone knows that gas appliances are not healthy in the home. They need to be converted to electric. The tiny apt. microwave is almost unusable.

- The apt. has only one old ceiling smoke alarm. They need to be replaced regularly.

- Cockroaches, mice, rats, bugs, and mosquitoes from drainage problems on the grounds can attract snakes.

IN GENERAL

- Standing water due to poor drainage leads to mold growth. Standing sewage is a serious health hazard due to the harmful microorganisms it contains. In the past, heavy rains exacerbate these standing water & sewer issues.

- The apartment interiors, appliances, heating/cooling, pipes, and old insulation are proven unsafe for human habitation. Possible lead paint, old iron/lead pipes, asbestos contamination, and poor indoor air quality can negatively impact respiratory health and overall well-being leading to respiratory issues, particularly in children, and prolonged exposure can lead to more serious health problems like heart disease and even death.

RECOMDATION: We recommend that the City of Corpus Christi address these inhumane living conditions.

Go for it. You have 750 million loan from the state that can only be used for a desal project. So partner with the Port in the Harbor Island Desal Project they have been wanting for years and it already has all the TCEQ permits and can produce over 12 times what the Hillcrest Neighborhood Desal could do. Vote NO to Hillcrest Desal. Then get the brackish water projects going to get us by until Harbor Island Desal opens.

Comment

I am a water person. For more than 57 years I have been swimming, sailing, fishing, surfing, canoeing, on Padre Island, Corpus Cristi Bay, Laguna Madre and the Nueces River.

Dr. McGregor's photos of Corpus Christi's past show a commercial oyster business in the early 20th century. After Corpus Christi dammed the Nueces River to form Lake Corpus Christi, the lack of fresh water input raised the salinity and local oysters failed to thrive.

To now add more salt to our already stressed Bay by discharging brine as planned in the current desalination proposals is wrong. For anyone to claim that it won't harm water quality reminds me of the testimony of the experts who, on behalf of cigarette manufacturers, claimed that cigarettes didn't cause health problems. This is serious!

As Members of Corpus Christi City Council, you are the stewards of our Bay's water quality as well as our quality of life. Do not allow desalination discharge into the Bay.

There are other ways.

Topic Request for fair allocation of reclaimed water at the Oso wastewater treatment plant

Agenda Item Number E & O

Comment

I am writing to express concerns regarding the current allocation system at the OSO water treatment plant, particularly in relation to equitable access for all users. The existing setup favors large-volume users, especially during weekends, which often results in smaller-scale users being unable to access reclaimed water when needed.

This imbalance creates a challenge for individuals and small-scale gardeners who rely on modest quantities of reclaimed water.

To promote fairness and ensure that all community members can benefit from the water, I propose implementing a tiered or reserved allocation system. Specifically, designating a dedicated time slot, such as the first hour of operation from 8:00 AM to 9:00 AM(or earlier if possible) exclusively for small-volume users with tanks holding between 100 and 300 gallons. This would allow smaller users to access water without competing directly with larger commercial or agricultural entities.
