j. *Public agency for resale untreated water rates.* The rates for the purchase of untreated water purchased by a public agency, which does not have a raw water supply contract with the city executed after January 1, 1997, is the average of the monthly raw water cost adjustments, established under subsection (b) of this section, for the period used to determine the composite cost of untreated water under the city's current contract with the public agency.

k. Temporary large volume industrial untreated water customers obtaining water, which is under contract to the city, from a reservoir under the exclusive control of a river authority.

	August 1, 2013 to July 31 September 30, 2014
First acre foot or fraction thereof	Minimum*
Over acre foot	\$1,100.00 per acre foot or fraction thereof

*Use the minimum charges in subsection (a)(1).

(b) *Raw water cost adjustment (RWCA)*. In addition to the charges for the base rates for water service, established in subsection (a), a separate charge for the costs of raw water, the RWCA, will be added to each consumer's bill, except public agency for resale untreated water customers without a raw water supply contract executed after January 1, 1997. (A public agency for resale untreated water customer without a raw water supply contract executed after January 1, 1997, will pay the lower of the composite cost, as defined in its contract with the city or the rate for public agency for resale untreated water customers without a raw water supply contract executed after January 1, 1997, specified in subsection (a)(2)g. of this section.) The RWCA will be based on projected system-wide raw water sales, adjusted for water losses. The RWCA will be calculated on an annual basis using the adopted utility rate model, according to the following procedures:

- (1) Use projected system-wide water sales based on historical consumption and projected growth, with adjustments for water losses.
- (2) Include the annual budgeted cost of debt service. Bond payments, amortization of deferred losses on refundings, and other debt service costs shall be applied to the RWCA in the same proportion as the raw water activities proportion of the original bond proceeds.
- (3) Include budgeted expenditures for purchases of water.
- (4) Include purchases of water rights, amortized over the duration of the water right agreement.
- (5) Budgeted expenditures for capital items shall be included as follows:
 - a. The expense of acquiring a capital item that costs not more than five hundred thousand dollars (\$500,000.00) shall be charged in the year in which it is acquired.
 - b. The expense of acquiring a capital item that costs more than five hundred thousand dollars (\$500,000.00) shall be amortized over the number of years used to calculate depreciation expenses, with the half-year convention used in the year of acquisition.
- (6) All operating and maintenance expenditures shall be charged based on annual budgeted amounts. These expenditures include operation and maintenance of dams, reservoirs, pipelines, wells, pumping stations, and related interfund charges.
- (7) All expenses for consultants, engineering, legal services, and administration shall be charged based on annual budgeted amounts in the proportion to which they apply to raw water issues.
- (8) Expenses related to the acquisition and transportation of emergency water supplies shall be included in the RWCA for the following fiscal year, unless foreseen and budgeted in advance, in which case they are included in the year budgeted.
- (9) Miscellaneous revenues related to raw water activity, such as oil and gas lease revenues and rentals, is applied as an offset based on annual budgeted amounts.

(10) Apply the credit for levelized Choke Canyon debt payments to city rate payers' RWCA. (The escalating payment schedule on the Choke Canyon debt was levelized through the creation of a reserve fund. In the initial years, payments greater than the debt service were made, with the excess going into the reserve fund. This excess was paid through a rate surcharge on ICL and OCL metered treated water customers. Now that bond payments exceed the levelized payment amount, the reserve fund is drawn on to make up the difference. Since only ICL and OCL metered treated water customers participated in building the reserve fund, the drawing on the reserve fund is only credited to the RWCA assessed against ICL and OCL metered treated water customers.)

(11) Include funds necessary to collect 1.35 times coverage on current annual debt service in order to improve the financial position and bond ratings of the city's water fund.

(12) Include funds necessary to establish and maintain an operating reserve fund with a target amount of twenty-five (25) per cent (or three (3) months) of annual operating expenses for the fiscal year.

(13) Include funds necessary to establish and operate a water capital reserve fund with a target amount of two (2) per cent of the respective annual water capital improvements program for the fiscal year or two million dollars (\$2,000,000.00) (whichever is greater).

(14) Include funds necessary to establish and maintain a future water resources reserve fund (Water Supply Development Reserve) with an ultimate target balance of thirty million dollars (\$30,000,000.00), and an annual contribution of approximately two million dollars (\$2,000,000.00) per fiscal year. Revenue from this Water Supply Development Reserve will be deposited into a fund set aside for this purpose.

(15) The minimum operating or capital reserves amounts are intended to provide for unplanned, unbudgeted expenses and revenue shortfalls, and will not be used for routine expenses.

(16) At fiscal year end, determine the amount of over or under collections that have resulted from difference between budgeted and actual expenses and offsetting revenues and the difference between projected and actual volume of water sold. Any funds realized in excess of annual expenses are available for either supplementing minimum operating or capital reserves, for addition to the capital funds for discretionary cash capital funding of the water utility, or to create and maintain a reserve to level out large fluctuations in raw water charges is authorized. Apply any remaining amount as an adjustment to the RWCA.

(c) *Definitions.*

Costs of raw water is the total of all costs of acquiring, producing, storing, conserving, and transporting untreated water from its source to the city's treatment facility and all other points of diversion. These costs include, but are not limited to, the costs of:

Note: Rates do not include purchased gas adjustment and sales tax, where applicable.

(e) *Purchased gas adjustment.* The rates in subsections (a), (b), (c), and (d) of this section are subject to gas cost adjustments as follows: Rates will be adjusted monthly by the city following the receipt of notice of the cost of gas from the supplier to pass on to the consumer the full amount of such cost adjusted for pressure base and gas loss and unaccounted-for factors. Additional fees and charges paid to the supplier, which are necessary for the city to receive the gas, shall be included in the cost of gas. All general rate customers, who consume over fifteen thousand (15,000) MCF in one (1) month, and who receive gas from the city's distribution system at the same pressure base at which the city receives the gas from its supplier (14.65 psi), shall be billed 2.05 per cent less per MCF for purchased gas adjustment than the general customer rate schedule.

(f) *Interruptions.* Deliveries of gas to commercial or industrial customers may be interrupted or curtailed in case of shortage, or threatened shortage, of gas supply from any cause whatsoever, to conserve gas for residential and other human need customers served hereunder, according to all mandatory orders of governmental agencies having jurisdiction.

Chapter 55 Utilities

ARTICLE VII. WASTEWATER RATES.

Sec. 55-100. Schedule.

(a) The monthly charge to be paid by users of sewer service furnished by the city's municipal sewer system, except as otherwise provided in articles VII and XI of chapter 55, shall be based on the amount of water used by the user according to the following rates:

Classification	August 1, 2013 to July 31 September 30, 2014
Inside city limits One-family minimum monthly charge (first 2,000 gallons)	\$ 25.96
Inside city limits One-family per 1,000 gallons over 2,000	5.25
Inside city limits One-family maximum monthly charge (up to 25,000 gallons)	146.71
Outside city limits One-family minimum monthly charge (first 2,000 gallons)	32.45
Outside city limits One-family per 1,000 gallons over 2,000	11.65
Outside city limits One-family maximum monthly charge (up to 25,000 gallons)	300.40
Inside city limits Commercial minimum monthly charge (first 2,000 gallons)	35.37

Inside city limits Commercial per 1,000 gallons over 2,000	3.76
Outside city limits Commercial minimum monthly charge (first 2,000 gallons)	44.21
Outside city limits Commercial per 1,000 gallons over 2,000	7.53

(b) The amount of water used to compute the monthly bills to one-family residential customers shall be computed on the basis of the "winter average" or "interim average" that is calculated under this subsection.

(1) Definitions.

a. *Winter averaging wastewater charge period:* The period of water and wastewater service during the three (3) complete consecutive reading periods commencing on or after December 1 of each year.

b. *Winter average usage:* The monthly wastewater usage established by the city during the "winter averaging wastewater charge period" based upon their average monthly water consumption during that period.

c. *Interim average:* The monthly wastewater usage established by the city for individual customers who have not established a "winter average usage". The "interim average" is recalculated each year based on the total "winter average usage" of all customers subject to winter averaging divided by the number of winter averaging customers, and is be the basis for monthly billings until a "winter average usage" as defined in subsection (b)(1)b. of this section is established for the individual customer.

d. *Service area:* The geographic region served by the city's wastewater system.

(2) *Winter average criteria.*

- a. The customer must receive wastewater service at one (1) location during the three (3) consecutive reading periods in order to establish a "winter average usage".
- b. "Winter average usage" charges shall apply to one-family residential customers only.
- c. The "winter average usage" shall be based on a customer's average water consumption for three (3) complete consecutive reading periods commencing with the customer's first reading period on or after December 1 of each year.
- d. The following method will be used to calculate a customer's "winter average usage":
 1. Add the three (3) winter months' water consumption to get total water consumption.
 2. Divide three-month usage amount by three (3) to get winter average usage. Such winter average usage shall be limited to a maximum of twenty-five thousand (25,000) gallons.
- e. Using the winter average usage, apply the applicable rates established in subsection (a) to calculate the customer's wastewater bill for each month until a new winter average usage is established or rates are changed. The adjusted rate that applies to service after ~~June 30~~ August 31 will reflect wastewater usage based on the previous "winter averaging wastewater charge period".
- f. New and relocating customers; adjustments:
 1. Customers new to the service area, who have not established a "winter average", shall be billed at the "interim average" rate.
 2. Customers who are relocating within the service area, who established a "winter average" at their previous address, shall be billed at the "interim average" rate or their "winter average" rate at the previous address, whichever is less.
 3. Customers who are relocating within the service area, who have not established a "winter average" at their previous address, shall be billed at the "interim average" rate.
 4. When a customer experiences a substantial increase in water or wastewater usage from hidden water leaks in the plumbing system during the winter average charge period, and if the customer can produce proof of repairs, the director of finance or the director's designee may adjust the wastewater bill.

(3) *Administrative change in rates.*

a. The city manager shall annually, based upon the winter average wastewater usage determined during the winter averaging wastewater charge period, adjust the rate in the new fiscal year applied to each customer's winter average or interim average so that the adjusted rate will produce an amount equal to the budgeted revenues.

b. In years in which preliminary winter average data is available to be used in the utility rate model for determining wastewater rates, the adopted wastewater rates will not be subject to an administrative change in rates unless the final winter average data is materially different than preliminary data. A difference of at least two (2) per cent shall be considered material.

(c) The rates established in subsection (a) of this section are based upon water consumption for wastewater service customers with wastewater characteristics of five hundred sixty-two (562) parts per million or less by weight of chemical oxygen demand index, two hundred fifty (250) parts per million or less by weight of biochemical oxygen demand index, and two hundred fifty (250) parts per million or less by weight of suspended solids index. If the wastewater characteristics exceed any of these parameters shall pay an additional abnormal wastewater surcharges as provided in section 55-148.
