

November 1, 2013

The President
The White House
Washington, DC 20500

Dear Mr. President:

The undersigned organizations write to you to express serious concerns over dramatic increases in flood insurance premiums as a result of recent changes to the National Flood Insurance Program (NFIP). Provisions included in the Biggert-Waters Act of 2012 will make flood insurance unaffordable for working Americans who have built homes and businesses to code and followed the law every step of the way. We urge you to delay implementation of certain portions of Section 205 and all of Section 207 until FEMA submits its congressionally-mandated affordability report under Section 236. This affordability study is imperative to understand the full scope of impact, and a federal agency should not pick and choose which parts of a law it can or will implement.

The Biggert-Waters Act of 2012 phases-in full actuarial rates on non-primary residences and businesses built before the first flood maps were established (pre-FIRM). It also requires that home buyers escalate immediately to the full rate upon purchasing a pre-FIRM primary residence. The Biggert-Waters Act will also phase out grandfathering. This means that properties built in accordance with all FEMA required elevations and applicable codes at that time may now be considered out of compliance, through no fault of their own, due to new flood mapping. FEMA has begun the phase-in for pre-FIRM properties, including homes purchased after enactment, and already we are seeing rate quotes for unaffordable increases and a chill in local real estate markets. In numerous instances, homes and businesses built to code and with no history of flooding are facing 2,000-3,000% increases in annual premiums. This drastic increase in premiums will cause property values and assessments to drop, bank mortgages to go into default, local tax bases to erode, and economies to be eviscerated. Ironically, while these increases were intended to make the NFIP solvent and protect taxpayers, it could have the opposite effect if business and homeowners are forced to drop flood insurance completely or face foreclosure as a result.

Severe repetitive loss designated properties notwithstanding, we respectfully urge you to administratively delay implementation of rate increases on all pre-FIRM businesses, non-primary residences, and homes purchased after enactment of the Biggert-Waters Act of 2012, as well as the purchase provision on all pre-FIRM primary residences. We also respectfully urge you to delay Section 207 in its entirety until the congressionally-mandated FEMA affordability study is completed and its recommendations are considered by Congress. Finally, please consider urging FEMA to hold a summit of industry stakeholders to consider long-term solutions to the sustainability of the National Flood Insurance Program.

The undersigned organizations support a fully authorized, sustainable, and fiscally responsible NFIP. However, fiscal sustainability must be balanced with protecting the businesses and homes built according to code and following all applicable laws. We understand and support the intent of the Biggert-Waters Act, but unintended consequences of the reforms threaten to harm the very people the program was designed to protect.

Sincerely,
