Re: June 25, 2024 Agenda Items L. 20-24

At the United Corpus Christi Chamber of Commerce (UCCC) we collaborate and advocate for our members to advance economic prosperity in the Coastal Bend.

The UCCC has long advocated for reliable and affordable water resources for our drought-prone region. Developing seawater desalination will ensure a drought-proof water supply that will enable the region, its citizens and businesses to thrive and prosper now, and in the future. Seawater desalination is a viable option for the 500,000 residents of the Coastal Bend region supported by the City of Corpus Christi's water resources and infrastructure.

On behalf of our over 1000 members, we would like to encourage the Council to approve agenda items L. 20- 24 in order to keep this important project moving forward. Thank you for considering this request.

Sincerely,

Topic	Water Supply
Agenda Item Number	1.
Describe Feedback:	I support a second reliable water source for the city of corpus Christi. Corpus Christi must be the leaders in the region to provide a clean reliable water supply to our region and our community. Our council should take a proactive approach to make this happen. To achieve this, it must be done responsibly. We must protect our limiting natural resources and provide water to our public. Both can be done together.
