Attachment 1 - Service Level Agreement

This Service Level Agreement ("SLA") is intended to provide an understanding of the level of service to be delivered by the AssetWorks for the Services specified in Attachment 2. The service levels set forth below apply to the Services provided by AssetWorks under the Agreement.

AVAILABILITY

AssetWorks will use commercially reasonable efforts to provide Services with an average of 95% Availability (as such term is hereinafter defined) for each quarter during the Term. For purposes of the Agreement, "Availability" during any quarter refers to an Authorized User's ability to log into the Application during such quarter, and will be calculated in accordance with the following formula:

$$x = (y - z) / y * 100$$

Where,

- "x" is the Availability of the Application during the quarter;
- "y" is the total number of hours in such quarter minus the number of hours during such quarter that the Customer is unable to log into the Application because of (a) regularly scheduled maintenance windows for the Application and for times in which Customer has been notified in writing (including e-mail) by AssetWorks in advance thereof; (b) a Force Majeure Event; (c) non-performance of hardware, software, ISP connections, and other equipment that is not provided by AssetWorks or certified by AssetWorks for use in conjunction with the Services (except as such non-performance is directly or indirectly caused by AssetWorks).
- "z" is the number of hours in such month during which the Customer is unable to log into the Application (other than for reasons set forth in the definition of "y" above); provided that AssetWorks has been notified or is otherwise aware (or reasonably should be aware) of Customer's inability to utilize the Application.

FEE ADJUSTMENT

In the event that AssetWorks does not meet the Availability levels set forth below, the amount of fees payable by Customer will be reduced as follows:

In the event the average Availability for the Application is less than ninety five percent (95%) during any two consecutive quarters, Customer will receive a credit to its account with AssetWorks of five percent (5%) of the amount of a quarter's aggregate AssetWorks Hosting Services fees paid or payable by Customer to AssetWorks.

AssetWorks' obligation to provide Customer with fee adjustments as set forth above is conditioned on Customer providing detailed written notice to AssetWorks of its contention that AssetWorks was unable to meet the applicable Availability levels. Upon receipt of such notice, AssetWorks shall have thirty (30) calendar days to investigate the contention. If, at the end of the thirty (30) calendar day period it is determined that AssetWorks did in fact fail to meet the applicable Availability levels, Customer will receive the appropriate credit to its account during the next invoice cycle.

The remedies set forth in this Section of this Attachment shall be Customer's sole remedy and AssetWorks' entire liability in the event of a failure of any Availability measurements to meet the thresholds set forth above.

Attachment 2 - Scope of Services

All of the services, functions, processes, and activities described below will be collectively described as the "Services" for purposes of this Agreement. All Services will be provided by AssetWorks to and for the Customer's benefit in a manner that will meet the objectives outlined in Attachment 1.

Application

Application refers to the Customer's licensed AssetWorks software, and 3rd Party Software hosted by AssetWorks.

Support Software

Support Software includes the operating system, utilities, database software, and all necessary licenses required to operate the Application.

Hardware

Server infrastructure using redundant web servers and Oracle RAC database servers is deployed within the primary Data Center located in Wayne, PA, to maximize uptime.

If required by Customer, Customer shall provide the telecommunications equipment (including the routers to be installed at the Data Center), communication line, and services for connection from Customer's site to the Data Center.

Database Instances

AssetWorks will maintain a single Production Database instance. This Production Database will provide the daily, real-time transaction data to the Application users.

In addition to the Production Database, AssetWorks will maintain one additional, non-production Database (Test). Upon request by Customer, AssetWorks will populate these additional Databases with Customer's Production data up to 4 times in any 12 month period at no additional cost.

For an additional charge as defined in Attachment 3, AssetWorks will furnish an Ad-hoc Reporting Database for use with the Customer developed ad-hoc reports. This Database will be updated from the production database every night and will allow the Customer direct access to its data for purposes of ad-hoc reporting.

Custom Reports

For an additional charge as defined in Attachment 3, AssetWorks will certify a Customer built Ad-hoc Report for scheduling execution from within the Application directly against the production database, certifying that the Report performs within appropriate performance guidelines and does not cause unacceptable response time issues. Once certified, AssetWorks will install the Report into Customer's production environment to make it available for execution submission from within the Application.

Backups

Backups are taken on a nightly and monthly basis. Monthly backup tapes are rotated to the offsite storage facility and maintained for 12 months before recycling. Database backups are taken each night using Oracle RMAN at a time determined by AssetWorks. File system backups are taken using Tivoli Storage Manager and are taken following the Oracle RMAN backup as part of a scheduled process.

For an additional fee, AssetWorks will schedule other 'Critical Points' for back-up, as defined and required by the Customer (e.g., month-end, year-end and before upgrades.). The Customer retains the right to have copies of back-up tapes mailed to the Customer's site on a schedule determined by AssetWorks.

Hours of System Operations

The Application will be accessible and available to the Customer and capable of any and all normal operating functions 24 hours a day, seven days a week except for periods of Scheduled Maintenance and previously approved outages. AssetWorks will not be held responsible for

inaccessibility arising from communications problems occurring anywhere beyond the AssetWorks side of the router resident at the Data Center, nor will these hours of unavailability be counted as unavailable.

Maintenance

AssetWorks will complete routine maintenance on the Application according to the published schedule. AssetWorks will publish schedules for subsequent years on its Customer Support web site. AssetWorks will provide at least 30 days notice to any changes in the schedule.

If AssetWorks is required to perform additional maintenance outside of the Scheduled Maintenance window, it will notify the Customer in writing of its request. The Customer and the AssetWorks will mutually agree on the downtime, which will then be considered a period of Scheduled Maintenance.
