Storm Water Fee Update

STAFF PRESENTER(S):

<u>Name</u>	<u>Title/Position</u>	<u>Department</u>
1. Gabriel Hinojosa	Assistant Director	Public Works

ISSUE:

The Public Works Department will be implementing a Storm Water Fee on residents' utility bills beginning in January 2022.

BACKGROUND:

The City's storm water system began being funded through the water rate in 1989. In 2008, the City established a fee for storm water, however the fee was combined with the residents' regular water utility rates. Under this process, the fee was calculated based on the customer's water consumption, creating a lack of transparency and in some cases, unfair fee amount paid.

In an effort to make the storm water fee more transparent, the Public Works Department is establishing the storm water fee that is based upon the customer's impervious surface area.

The attached presentation will describe the implementation plan and further details for the Storm Water Fee.
