Industry should be responsible for financing the inner harbor water treatment plant

Comment

I hope this message finds you well.

I am writing to provide my thoughts regarding the Corpus Christi inner harbor desalination plant expense.

I firmly believe that the industry should be responsible for financing the Inner Harbor Water Treatment Plant if they intend to utilize it. This allocation of costs is crucial to ensure that the project is sustainable and that its benefits are maximally realized by those who will benefit from its services.

Thank you.

Dear Mayor and Council members,

I surely would not agree that Corpus Christi is a boring place. At least the City Council meetings aren't boring.

Regarding agenda item 12. I sure hope this is pulled from the consent agenda. This looks like another attempt of Bill Mahaffey to go beyond the City's mission. The gas department has a hard time fixing the current leaks in the system within the city limits. Acquiring Rockport's gas system assets will be a distraction as well as a \$5.5 million expense. The City gas department, first and foremost and forever, is to provide service for the residents of Corpus Christi. It is not to acquire or expand its operations outside the city's limits. Does Bill have the same dream as Drew and Estaban, to run a regional utility system outside the direction of the City Council? To establish an entity outside the oversight of the City Council? Beware of Bill and keep a close eye on what he is up to.

Agenda item 16 is throwing more good money into a very expensive and slow new water source that may or may not work as people think it will. There are many other cheaper and faster sources of new water. Those should be pursued first. Keep in mind, Drew sits on the Texas Desalination Association board of directors with Josh Tebbe, from Kiewit and Micael Pankratz from GHD. Drew was the lead scorer for the desal proposals. The Kiewit proposal was the most expensive of the three proposals. At the very least, Drew should have recused himself from scoring the proposals. Kyle Frazier, the Executive Director, of the Texas Desalination Association has refused making public the Association's last 2 years of 990 forms as required by law. They are currently under investigation by the IRS.

Item 17, regarding rules of decorum. The rules aren't currently being followed. The City Charter forbids wearing hats. This has already been brought to the Mayor's attention. My comment is rules should be the same for everyone, including those on the council. Bull cr_p, is sh_t. One is two words and one is one word. They both have the same meaning. So, whatever sanctions ranging from admonishment to termination of comment to removal from the meeting should apply to everyone present. I look forward to all current and future rules of decorum to be enforced by all present during the meeting. If you don't want to enforce some rules, remove them. In the meantime, no hats allowed. Appendix 5, letter e, number 7, No wearing of hats, caps, or headgear, except for medical or religious purposes. Letter J, addresses City Council being courteous, polite, concise, and respectful. Roland's snide comments regarding commenters are in violation of decorum. The Mayor runs the meeting and all Council members can call a point of order when they see or hear a violation. If the Council refuses to enforce any of the rules of decorum in the City Charter, the Council should remove them.

Lastly, item 25 regarding fees for attorneys, depositions fees, and court costs. If any current or past Council members and/or city staff are involved in litigation because of unethical or bad judgement, that is on them. The city taxpayers should not be providing any legal or monetary assistance to the people involved.

As always, have a nice day,

John Weber

This is a bad deal for the CITIZENS of Corpus Christi. We need to take desal back to the drawing board, incorporate the ENTIRE Corpus Christi MSA in the project and ensure that the risk falls on the shoulders of everyone instead of solely the citizens of Corpus Christi. The city needs to partner with all entities around the bay and work together on a scalable long term solution that provides for intake and discharge into the Gulf of Mexico rather than Corpus Christi Bay.

Desal and saving interest on that loan

Agenda Item Number

Comment

We Hillcrest "campus" residents strongly oppose the "Desal campus" being built in our neighborhood. The interest on previous council's Desal loan is \$112mil. Vote NO on this \$50mil expenditure and you have saved almost half of that today. Then use it to save on that state loan interest. Maybe you could request Todd Hunter get TX to forgive the other \$62mil.

If still in effect, your 1 topic rule prevents me from saying I approve of Evangeline, agenda items 20 and 22.

Comment

My name is Brittini Young. I am a resident of Corpus Christi, and reside in District 3. I'm writing you today to ask you to vote no on agenda item 16. Why is the council adverse to finding alternative cost-effective water solutions to our water crisis? We are nearing \$1.2 billion dollars for building the Hillcrest/Inner Harbor desal plant. This price is astronomical, and what is more astronomical is the residents of Corpus Christi will inevitably have to pay for this plant. Why should the residents, who are already struggling, have to pay this bill? We didn't consume ourselves into this water crisis. We didn't oversell our natural resources to industries who DO NOT reinvest into the well-being of this city. Thoughtless leadership will continue to move forward with this disastrous plan to build the Hilcrest/Inner Harbor desalination plant. Logical leadership would let go, and halt the development of this plant. Please lead with logic, and vote no on agenda item 16 before it's too late.

As a property owner and tax payer in Nueces County, I ask that you delay the vote regarding the design development of the HWTC project. As an elected council person, you have a fiduciary responsibility to the public tax payer. I ask that you delay the decision in order to personally research the full and detailed cost of this and future desalination projects. I also ask that you weigh the economic impact of an environmental lawsuit and or the potential for a negative EPA ruling on these projects.

I realize the significance of these decisions, and I simply ask that you take into account the future of our God given natural resources and the impact upon future generations of Texans.

Sincerely,

Lori Jo Walker

Staff recommendation to develop a citywide plan for affordable housing .

Agenda Item Number

#18

Comment

I am submitting comment to the Corpus Christi City Council in support of the City Planning and Neighborhood Development Department's recommendation to undertake a citywide plan to identify and analyze the City's current and future housing needs. The scope of work intends to include housing needs at all income levels. Funding sources for this initiative to support a third party professional are appropriate.

As Housing Navigator at Coastal Bend Center for Independent Living under contract with the Council of Governments Area Agency on Aging/Aging & Disability Resource Center, I and my colleagues at "Ending Homelessness Together" urge solicitation of direct input from households and unhoused persons with lowest incomes at thirty (30) percent and below of Average Market Income (AMI). Targeting is necessary for a comprehensive Plan to prioritize the greatest need for affordable, accessible housing by household, housing type, location and commitment to prevent homelessness.

Proposed Housing Needs Assessment and Toolkit to be included in the FY 2026 Corpus Christi Housing Finance Corporation budget

Agenda Item Number

18

Comment

As the CEO of Coastal Bend Community Empowerment, a team leader of Ending Homeless Together, and a member of Housing Issues Partnership, I am in full support of this proposal from the Planning and Community Development Department.

Gathering the data specified in this proposed Housing Needs Assessment and Toolkit is the first step toward developing a long overdue comprehensive housing development strategy for our community.

Without such a strategy it is impossible to make proactive housing development decisions at a time when the lack of affordable housing is at a disaster level crisis for the increasing number of displaced residents.

We currently have an overabundance of housing being developed in the name of "affordable housing" which is not affordable for the residents who need it most. We need a comprehensive, evidence-based strategy to competently address the real housing needs in our community.

An adequate water supply is not our only crisis.

IH Desal amendment No 5 \$50M design build contract with Kiewit to 60% design dvlpmnt

Agenda Item Number

Comment

I ask you to Vote NO or TABLE item #16 - please stop the spending on the desal plant.

Project has been mismanaged, poorly communicated with us residents & CCMs & not transparent. How much will our residential H2O rates & WW increase? Why do we have to foot the bill for this project that serves private industry more than us.

This unchecked industrial growth will be at the expense of our community's health & environment.

The \$1.2B cost is too costly for the amount of H2O to be produced. Then there's operating & maintenance costs, then how much energy will this take?

I'm concerned with CCM not being able to get the modeling report from Kiewit's engineers - GHD - saying that it's proprietary just doesn't sit well.

I'm worried about the environmental impacts on the bay - how it will threaten marine life, fishing, & the coastal ecosystems. I would like to see the brine discharged into the gulf instead.

This project seriously raises environmental, financial & ethical concerns.

I am a proponent of desalination. I am also a conservationist, sportsman and love the life here on the coast. The Laguna Madre is one of our greatest assets here in the coastal bend and draws people from all over the state and world. Our fishery and management by Texas Parks and Wildlife is the envy of many coastal states. The legendary Laguna Madre and Baffin Bay are in our backyard and we must fight to keep from pumping a brine waste stream back into it. We cannot send brine waste streams back into the bays, it is too fragile of an ecosystem for us to try and manage the modeled salinities and learn our lesson too late.

The most responsible waste stream method would be diffusion into the gulf or industrial use.

Let's bring desalination to Corpus Christi the right way.

Respectfully,
Neal Kunkel

I am writing to urge you to please vote NO on Item 16 on the 7/29/25 City Council agenda.

This item would approve a contract amendment with Kiewit to advance the design of city staff's proposed Inner Harbor desalination plant to 60% completion.

Already the projected cost of the plant has doubled from the original estimate to nearly \$1.2 billion, and staff's July 15th memo revealed that the final price could still increase to nearly \$1.8 billion. Even at \$1.2 billion, Corpus Christi would be building the most expensive large-scale seawater desalination plant in the world on a cost-per-unit basis.

Beyond the still-unknown final price tag – and the still-unknown increase in water bills for residents and small businesses that would be required to pay for the plant – huge questions about the project remain unanswered.

Please, take action NOW to stop the Desal Disaster before it happens and vote NO on Item 16.

IHWTC Design Amendment

Agenda Item Number

16

Comment

Hi Councilmembers,

I cannot in good conscience support spending more money on the design for the IHWTC with the current outstanding issues that have yet to be addressed.

I believe there is insufficient data available to you and the public to make a decision that is in the best interest of the Coastal Bend. The current modeling is unvetted, with sparse results, all of which is years past due and is currently being rushed through with little to no disclosure.

This data is critical because it is resident's ONLY guarantee that our investment in this water supply will be sound. No one will bail us out if the City gets this wrong and the plant is a failure. The science is our only lifeline and City staff have been unfairly gatekeeping this vital information from you and the public.

I lived in Flint Michigan for six years. I know what happens when resource managers get it wrong. Please delay the vote until the available science has been published and vetted.

Respectfully,

Jason Hale
