

City Wide Collection System Pipebursting Indefinite Delivery/Indefinite Quantity (ID/IQ)

Council Presentation
December 15, 2015

Project Location

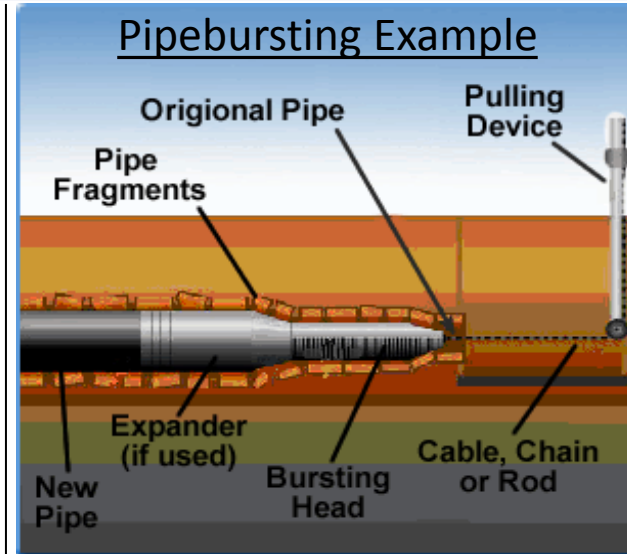

Project Scope

This project is part of the City's ongoing Program to re-capitalize the aging sanitary sewer collection system and to eliminate overflows and infiltration.

Major activities include:

- Rehabilitation and/or replacement of gravity collection lines by pipe bursting lines (6" to 24" diameter)
- Control of wastewater flows (bypassing)
- Cleaning and televised inspection of conduits
- Temporary traffic control measures

A bursting head is pulled through the existing pipe effectively breaking the old pipe into pieces and expanding the cavity allowing the new pipe to be simultaneously pulled into place behind the bursting head.

Bid Summary

Contractor	Base Bid
PM Construction & Rehab, LLC	\$13,863,200.00
T Construction, LLC	\$14,374,990.00
National Power Rodding Corp.	\$15,273,722.50
Note: The unit quantities outlined in the bid documents were for evaluation purposes only to represent possible quantities over a five-year contract duration equating to a \$18,750,000 total budget.	

The ID/IQ contract documents were prepared as a one-year \$3,750,000 base construction contract with the option to extend up to four (4) possible one-year renewals. Subsequent additional option years will be administratively authorized by the City Manager or designee based on available funding.

Project Schedule
