City Code Requirement - Residency

As a board, commission, or committee member, you will be asked to adhere to City Code of Ordinances, Section 2-65, which states that all members of City boards and commissions, including ad hoc committees, appointed by the City, must be residents of the city. A move outside the city limits of the city by any member shall constitute automatic resignation from the particular board or commission on which such member served.

I Agree

City Code Requirement - Attendance

As a board, commission, or committee member, you will be asked to adhere to City Code of Ordinances, Section 2-61, which provides that absences from more than 25% of regularly scheduled meetings during a term year on the part of any board, commission, or committee member shall result in an automatic termination. An absence shall be deemed unexcused unless excused by the board, commission or committee for good cause no later than its next meeting after the absence.

I Agree

Consent for Release of Information

I understand that if any member of the public makes a request for information included in this application or in any attachment (e.g. resume or supporting documentation) for appointment it is subject to and must be disclosed under the Texas Public Information Act. Employment History:

1983-Present Friday February 13, 1983 my dream to open my own business comes true. I became owner and CEO of Margaret’s Greenhouse and European Floral Design. Full Service flower shop, interiorscaping, and landscaping with instruction in Floral design and Horticulture. Teaching Flower Design on premises or in television.

2010-Present. Business Consultant for various small businesses, Medical Offices, Real Estate Investments

2011- Producer of “Flower Talks - The Language of Love” with Margareta and “Bright Star-The Magic Romanian Matchmaker of All.” The shows are produced and aired weekly (so far we have over 160 episodes aired)

Feb 16, 1881 Immigrated to Untied States-became citizen in 1990

Feb 16 1982 arrived in Corpus Christi TX, crossing the Harbor Bridge penniless, but with a big dream that it was accomplished and I am looking forward to help our citizens to accomplish their dreams and live in a safe and pleasant environment.

Personal:

Proud Mother of two children and four grandchildren

Languages spoken: Romanian, French, English, Russian, Latin, German

Dreams and Aspirations

Writer of the book in progress, "A Flight to Freedom," to be followed by a motion picture cast in Romania, Corpus Christi, TX and other world places. When finalized and approved by publisher and producer as being ready I will present it to the George W. Bush Presidential Library in Dallas, where I am a Charter Member, for signing and fundraising for the "Fight to Freedom" section helping with the fundraising for other immigrants who will want to share their life story of struggle and success. The book is a real life motivational story of my own struggles and success as an immigrant, to follow and accomplish my dream in the free world.

<http://www.ustream.tv/recorded/652159>

Skills and Trades:

- Sociable and Personable to the Extreme
- Personal Advisor and Counselor
- Fantastic Promoter and Social Events Organizer
- Network "QUEEN" (as I am known)
- Extremely versatile in protocol, good manners and people skills
- Negotiator and peace maker
- Knowledge of people characters and body language
- Proved success in leadership abilities and business management adviser
- My principles and moral values are timeless and endless, therefore I have many followers of my principles, everyday, in every areas of their life.
- Stephen Leader-Stephen Ministry trained to teach God's care for caregivers.

Goals and Ambitions:

To share my diversified knowledge with the people of all races, colors and religions, as long as they comes here in the USA, from all over the world in a purpose to overcome their struggle through education, beliefs, and following their dreams of freedom with hard work and faith. I want to serve the people in Corpus Christi, the city that I love and its citizens where they become my adoptive family.

My message is that KNOWLEDGE IS POWER and each and every American should appreciate and look to this country through the eyes of an immigrant.

MAY GOD BLESS AMERICA, and KEEP IT ALWAYS FREE!!!

BBA-Finance, Texas Tech University (1986) MBA - University of Phoenix (1997) US Army Reserve, 1982 - 1997 (Staff Sergeant) Island United PAC Member 2012-2013 PIPOA Architectural Control Committee - 2013 to 2018

Why are you interested in serving on a City board, commission or committee?

I believe it is important for citizens to be involved in City governance. I believe in volunteerism and am passionate about advancing Corpus Christi by working with City departments, and City Council. Past member and Chair of the Padre Isle POA Architectural Control Committee. I have served as the District 4 representative on the 2015/16 City Charter Ad Hoc Review Committee. The committee is temporary, serving from September to June, and is commissioned by Council every 5 years. The charge of the committee is to review amendments to the City Charter, such as term limits, council pay structure, residential street repair funding, and various changes to the Charter based on feedback from the City Attorney's office.

SUMMARY

Product Manager/Business Analyst experienced in product development, requirements elicitation, client service/account management, and team leadership. I am a self-starter and motivated team player who thrives under deadlines and successfully multi-tasks time critical projects. Excellent skills in MS Office products (Word, Excel, Outlook, PowerPoint), MS SharePoint, SQL database query, WS FTP, and Visio.

EDUCATION

University of Phoenix, MBA	October, 1997
Texas Tech University, BBA Finance	July, 1986

PROFESSIONAL EXPERIENCE

Product Manager, Customer-Side and Government Reporting

Talisys, Inc.

Remote Employee

October, 2013 – Present

- I work remotely from my home office in Corpus Christi, with regular trips to the Little Rock, AR and Golden, CO offices.
- Co-Team Lead for the Customer-Side team. Responsible for regulatory changes and enhancements to a securities brokerage software platform. Customer-Side team is responsible for most back-office applications such as Corporate Actions, Income Processing, Cost Basis, and Tax Reporting.
- Work extensively with clients for input into requirements for current and future projects.
- Create and implement best practices in back office processing as a service bureau.
- Execute the full software development life cycle for assigned projects.

Director, Product Management

Broadridge Financial Solutions, Inc.

Wheat Ridge, Colorado

May, 2000 – October, 2013

- Full-time consultant for Broadridge through Apex Services, Inc. April 1, 2012 – October 13, 2013 due to a move from Denver to Corpus Christi.
- Product director for a brokerage portfolio accounting and performance reporting (Cost Basis) system used by a number of large and medium sized brokerage firms. The company acts as a service bureau for many broker dealers. Service bureau clients included correspondent clearing firms, full-service brokerage firms, discount brokerages, day trading firms, and small boutique brokerage firms.
- Product manager responsible for new client conversions.
- Wrote software requirement specifications to modify or upgrade assigned subsystems.
- Managed development project teams during the life-cycle of several competing and time-sensitive projects.
- Multi-tasked to ensure each project moves along as planned.
- Composed requirement matrix documents used to map technical and functional requirements. Worked closely with Quality Assurance throughout the testing and release phases of my projects.
- Worked closely with clients for both requirements research prior to finalizing a software requirements specification, and the beta testing/general software release process.
- Prior to 2010, served as the product manager and operational production manager for tax reporting for 18 service bureau firms. Produced over 80 million 1099 forms each year. Filed information returns with the IRS. Maintained close relationships with clients, IRS agents, and outside vendors of tax reporting information and statement services.

**Director, Managed Care
Private Healthcare Systems, Inc.**

Denver, Colorado
May, 1991 – January, 2000

- Director of PPO operations in several states, to include contracting responsibilities for 8,500 physicians, 80 hospitals, and over 350,000 members.
- Primary contract negotiator for assigned markets. Analyzed and reported financial impact of negotiated deals.
- Team leader for Competitive Reimbursement Project, a tool used to develop hospital and market reimbursement targets based upon competitive information and market equilibrium prices.
- Developed and analyzed financial impact of market physician fee schedules.
- Analyzed impact of ancillary health care facility deals.
- Liaison between providers and PHCS' partner insurance carriers. Worked with hospitals, ancillary managers, and physician group managers to help resolve claims and service issues.
- Responsible for departmental budget, expense control, and the supervision of department staff.

**Managed Care Coordinator
Presbyterian/St. Luke's Health Care System**

Denver, Colorado
April, 1989 – May, 1991

- Negotiated and managed 86 HMO and PPO hospital contracts for a three-hospital system. Analyzed financial impact to hospital revenues that each contract produced, and presented monthly/quarterly financial reports to senior management.
- Assisted in the development of a cost accounting and case-mix system.
- Acted as a liaison between hospital business office, admissions, and utilization review personnel and the payers.
- Developed admitting and claims processing policies related to managed care contract fulfillment.
- Responsible for maintaining managed care payer information on the hospital's admissions system.

**Assistant Executive Director – Finance
Humana Hospital – Aurora**

Aurora, Colorado
August, 1986 – April, 1989

- Directed business office, admissions, accounting, data processing, materials management, and medical records functions. Reviewed month-end close, and prepared variance reports for corporate accounting.
- Produced weekly financial projections for Division CFO.
- Produced Capital Asset ROI models.
- Produced annual hospital budget and handled annual physical inventory. Audited cash and controlled drugs each quarter.
- Served as Financial Specialist from August, 1986 – January, 1988 at Humana Hospital San Antonio.

PROFESSIONAL AFFILIATIONS

- Certified Information Return Filer (CIRF), National Association of Form 1099 Filers (defunct organization)
- Former board member - National Association of Form 1099 Filers
- Former Staff Sergeant, U.S. Army Reserve (1982 – 1997)
- Former Architectural Control Committee member – Padre Isles POA
- Former Committee Member: 2015/16 Corpus Christi City Charter Review Committee – Mayoral appointment

Are you, your spouse, your business or your spouse's business involved in any pending bid, proposal or negotiation in connection with a contract with the City?

Yes No

Do you or your spouse have a pending claim, lawsuit or proceeding against the City?

Yes No

If you answer "Yes" to any of the questions above, please explain or ask to speak with the City's Legal Department.

NA

Board-specific questions (if applicable)

Verification

City Code Requirement - Residency

As a board, commission, or committee member, you will be asked to adhere to City Code of Ordinances, Section 2-65, which states that all members of City boards and commissions, including ad hoc committees, appointed by the City, must be residents of the city. A move outside the city limits of the city by any member shall constitute automatic resignation from the particular board or commission on which such member served.

I Agree

City Code Requirement - Attendance

As a board, commission, or committee member, you will be asked to adhere to City Code of Ordinances, Section 2-61, which provides that absences from more than 25% of regularly scheduled meetings during a term year on the part of any board, commission, or committee member shall result in an automatic termination. An absence shall be deemed unexcused unless excused by the board, commission or committee for good cause no later than its next meeting after the absence.

I Agree

Consent for Release of Information

I understand that if any member of the public makes a request for information included in this application or in any attachment (e.g. resume or supporting documentation) for appointment it is subject to and must be disclosed under the Texas Public Information Act. I understand that under the Texas Public Information Act, my home address and home telephone number is subject to public disclosure unless I am elected or appointed to the position which I seek. I hereby consent to the release of my home address and home telephone number should it be requested under the Texas Public Information Act prior to my possible appointment or election. I hereby release the City of Corpus Christi, and its agents, employees and officers, from any and all liability whatsoever if the information must be released pursuant to the Texas Public Information Act.

I Agree

Ted Mandel
15306 Key Largo Court
Corpus Christi, TX 78418
713.515.6712

QUALIFICATIONS OF TED MANDEL

Over fifty years of experience in service to customers and employees in the areas of management, marketing, sales, customer service and revenue management. Have started new operations and supervised the turn-around of troubled organizations.

EMPLOYMENT HISTORY

Mandel Associates, Inc. 2003-2016
President, Houston, TX

Assisted hotel ownership groups with marketing, pricing and revenue management programs for their properties. Provided "devil's advocate" advice to a group considering an airline start up in Europe. Developed a revenue management system for an airport parking company. Created a pricing model for a movie theatre chain that mirrors travel industry pricing. Assisted a medical office practice in applying revenue management techniques to the scheduling of appointments. Developed a business retention program for a chamber of commerce economic development effort.

MileSpree, Inc. 2000-2003
Vice President-Sales and Customer Service, Houston, TX

MileSpree Rewards was an Internet version of an airline frequent flyer program. I created a database of 5-million members and secured 300 name brand merchants where members could earn "miles" for purchases. Generated traffic that placed MileSpree in the top 2% of web sites.

PROS Revenue Management, Inc. 1998-2000
Managing Director-New Markets, Houston, TX

Brought in to develop a new business unit for the company that would market revenue management solutions to industries other than the company's core airline market. Those industries under development included healthcare, media, equipment rental, and venue ticket sales. Sold a \$574,000 study and a \$1.7M system to major Healthcare provider.

Pan American World Airways, Inc. 1996-1998
Managing Director-Marketing Services, Miami, FL

Responsible for the start-up of reservations, loyalty program, promotion, pricing, revenue management, marketing automation systems, and specialty sales. Selected the vendors and negotiated the contracts for the reservations tele-center and three key automation systems. Launched frequent flyer program and negotiated partner participation contracts. All functions were brought on-line on time and under budget. Beat budget forecast by \$1,650,000 (15%).

Mandel Associates, Inc. 1992-1996
President, Ft. Lauderdale, FL

Assisted in the start-up of a national cruise-only agency that had \$500,000 in revenue in its second month. Deliverables included selection and negotiation of telephone equipment, staffing level recommendations, automation selection and negotiation, and the training plan. For Western Pacific Airlines, designed their call center, provided facility and furniture recommendations, and determined telephone call forecast and staff level projections. Projections were within 5% of actual. Provided trunking and staffing expertise to ARINC. Acted in the capacity of Director - Marketing & Sales for AirTran Airlines and secured their first government contracts and corporate accounts. Implemented BWIA Frequent Flyer program securing 50,000 members in the first month, and moved US calls to Trinidad saving \$1,200,000 a year. I turned around the telephone center operation of a major travel wholesaler after their purchase of a competitor caused major integration problems. Installed methods and systems that reduced the telephone center cost per sale 13.5% in just eight months. During the period calls were up 20% while call-answering time decreased 18%. Planned and opened a 220-position telephone center in Ft. Lauderdale. Created a four-week new hire training program where no previous program existed.

Worldwide Transportation Group
Vice President/Management Consultant, Houston, TX

1990-1992

Provided marketing direction to a wide variety of clients. Directed the turn-around of the phone center management of Mexicana Airlines to allow them to compete in the U.S. market. Successfully brokered charter flights for numerous organizations, including professional and college sports teams and the 1992 Super Bowl. Designed and conducted the sales training program for reservations staff at Australia's Compass Airlines.

Continental Airlines (Texas International Airlines)
Vice President - Marketing Services, Houston, TX (1987-1990)

1966-1990

Managed the company's reservation sales group of 5,500 people with \$150 million budget. Reduced unit cost 20% by installing better management systems, negotiating lower telephone charges, and reducing number of locations from ten to seven. Enhanced work systems in customer relations group allowing for 40% staff reduction, while handling the same amount of correspondence. Changed format of customer satisfaction report that allowed senior management to focus and correct concerns. Complaints to Department of Transportation dropped over 50% the following year. Instituted special holiday celebrations on-board aircraft that increased employee and customer satisfaction. Changed reporting relations of airport clubrooms that empowered employees and made them an elite service group. Complimentary letters from members increased over 200%.

Senior Director, One Pass Services, Houston, TX (1987)

Combined the former Eastern and Continental Airlines frequent flyer program services into one center. Grew from 100 to 300 employees, while installing new phone system and Membership Data Base System. Worked off backlog of 270,000 pieces of customer correspondence in 4 months. Systems and procedures installed helped One Pass become the top ranked program in the industry.

Senior Director, National Marketing, Houston, TX (1986-1987)

Resurrected National Marketing programs the company had abandoned in bankruptcy and in less than one year brought in over \$10 million in cruise line revenue, \$5 million from sports teams, and negotiated a \$50 million 3 year agreement with Pepsi.

Vice President - Marketing (Continental West Division), Los Angeles, CA (1985-1986)

Founded a start-up west coast commuter. Implemented unique food service programs such as ice cream sundaes and baked chocolate chip cookies in-flight. First to use a wrap of USA Today to promote a product. Became a test bed for products and services for system-wide use.

Director - Sales Western Region, Los Angeles, CA (1984-1985)

Responsible for sales to travel agents and corporations immediately following company's reorganization. Overcame strong objections to travel on an airline in bankruptcy as evidenced by Continental's monthly increases in load factors.

Director Revenue Management, Houston, TX (1983)

Took control of the passenger revenue maximization unit that was in turmoil due to corruption of the passenger inventory system and achieved maximization of bookings. Took exceptional risk by overbooking as much as 75%. Achieved 95% load factors on flights booked full with less than .001% denied boarding.

Regional Director, Reservation Sales, Denver, CO (1982-1983)

Took an office of 600 that was demoralized and under productive and turned it around to be best in the company. Productivity increased and job satisfaction doubled as evidenced by a before and after employee survey.

Various, Los Angeles, CA, Longview and Houston, TX (1966-1982)

Positions included Reservations Sales Manager, Manager Central Reservations Control, Director Passenger Revenue Management, Director Reservation Services, and Regional Director Passenger Service Training. During this period brought new people management techniques to Texas International that improved productivity, established a Yield Management System that generated \$20 million a year in incremental revenue, helped establish the airlines operation in Hawaii, and took training out of the central office and brought it to the line offices.

Consent for Release of Information

I understand that if any member of the public makes a request for information included in this application or in any attachment (e.g. resume or supporting documentation) for appointment it is subject to and must be disclosed under the Texas Public Information Act. I understand that under the Texas Public Information Act, my home address and home telephone number is subject to public disclosure unless I am elected or appointed to the position which I seek. I hereby consent to the release of my home address and home telephone number should it be requested under the Texas Public Information Act prior to my possible appointment or election. I hereby release the City of Corpus Christi, and its agents, employees and officers, from any and all liability whatsoever if the information must be released pursuant to the Texas Public Information Act.

I Agree

Oath

I swear that all of the statements included in my application and attached documents, if any, are true and correct.

I Agree

JOHN MONTALVO

Education

Master of Science | Architectural Engineering
Focus: Construction Engineering and Project Management
College of Civil Engineering
University of Texas at Austin | 1991

Bachelor of Environmental Design | Architecture
College of Architecture
Texas A&M University | 1986

University of Houston | 1999 – 2000
Successfully completed half of the graduate coursework toward a Master of Science degree in Civil Engineering
No degree

University of Texas at Austin | 1988 - 1989
Successfully completed two years of undergraduate civil engineering course work as pre-requisite for master's degree
No degree

Del Mar College | 1981 – 1983
Corpus Christi, Texas
Successfully completed core undergraduate coursework
No degree

Richard King High School | 1981
Corpus Christi, Texas

Background

John has over 25 years of experience in all phases of design and construction. John previously worked for Hensel Phelps Construction Company in their general contracting, program management and international divisions, and is currently working for Lockwood, Andrews & Newnam, Inc. in their infrastructure water conveyance group and previously with their architectural aviation group.

John's experience includes architectural and civil engineering, construction phase services, resident engineer/architect, program management, resident construction manager, inspection, consultant City project manager in construction branch of public works department, and cost estimating on a wide variety of projects, and contract types, ranging from lump sum and unit price, competitive sealed proposals, conceptual estimating, to a CMAR cost plus fixed fee with a guaranteed maximum price. Projects have ranged up to a \$300M design-build fast-track 24/7 complex high-tech project.

John has a proven proactive management approach to completing projects on time, within budget and in accordance with the contract documents, from NTP to testing, startup, commissioning and project closeout, with the proven ability to promptly respond and prepare or assist with solutions to unforeseen and differing conditions, including the timely, fair and judicious use of work change directives that avoid or minimize time and cost impacts.

John maintains constant and timely communication with clients and their operation and maintenance staff, and effectively coordinates with the design team, contractor, inspectors, testing labs, permitting agencies, general public, public officials, tenants, management districts, private utility owners, manufacturers, suppliers, and other stakeholders.

John has developed and implemented management information systems for various programs and projects, and has assisted clients with updating or creating management process manuals, document control systems, general conditions and general requirements.

John has extensive constructability review experience, and value engineering, cost estimating experience, including the development of a cost model for a 108-inch diameter waterline transmission program for estimating project costs when key variables are changed such as pipe diameters, pipe thickness, trench width, trench depth, types of backfill material, forecasted price of steel, assumed production rates for urban and rural locations, forecasted bid dates, etc.

John has successfully managed and assisted Clients with breach of contract terminations (ex., contractor non-performance, bankruptcies), including effectively working with the Client and Surety to retain an acceptable take-over contractor to complete the remaining work.

Aviation Projects

William P. Hobby Airport Central Concourse, Ticketing and Central Plant Upgrades – Houston Airport System, Houston, TX, \$77M (2000 – 2003):

John was the resident design representative for this program. The primary project in the program was the construction of a new 374,000 SF central concourse with 20 gates for Southwest Airlines, including a new ticketing facility, pedestrian connector

bridge and baggage handling and central plant facilities. The new facility was built primarily with cast-in-place concrete, structural steel, glass curtain walls, skylights, and standing seam metal roofs. The work included a utility tunnel, underground hydrant fueling system, fire suppression and fire alarm systems, MEP, telecommunication systems, security systems, elevators, moving walkways, baggage handling systems, central plant renovations that included 4 new chillers with variable speed drives, piping, pumps, electrical and SCADA upgrades, including installation of temporary chillers before existing could be demolished to make room for the new chillers.

John was responsible for coordinating with the owner, program manager, contractors, the Houston Airport System's managers and operators, various airlines and tenants, various inspectors, code enforcement, permitting, various design consultants, testing labs, contractors, etc. He provided on-site design support to clarify design issues, identify and resolve contractor deficiencies, facilitate solutions to unforeseen and differing conditions, including contractor deviations and deficiencies, and assist with various Client and Airline requested modifications to minimize cost and schedule impacts. John's responsibilities required multi-discipline coordination from civil, architectural, structural, environmental, electrical, mechanical, security, communications, elevators, and baggage handling in order to coordinate with design consultants, clients, airlines, end users, inspectors, testing labs, contractors, subcontractors, and code enforcement.

Mail Sort Facility and Police Dog Kennels at Bush Intercontinental Airport—Continental Airlines and City of Houston, Texas (1998-1999): John was a project manager in the program management division of Hensel Phelps Construction Co. providing program management services for the former Continental Airlines. He was responsible for managing the design team and the contractor and testing lab, which included conducting various meetings, pay estimates, RFIs, submittals, change orders, and managing the project schedule and costs. John successfully helped with a major design change that required shifting the entire facility and worked closely with design team, Continental Airlines, the Houston Airport System and City permitting department to expedite a solution that minimized the cost and schedule impacts.

Projects – Lockwood, Andrews & Newnam

Nueces County Hazard Mitigation Action Plan (HMAP) – Multiple Jurisdictions, Nueces County, City of Corpus Christi, et al., TX (2017-current): Team member assisting with the research, data acquisition, analysis and writing of the HMAP, and successfully completed the Local Mitigation Planning Workshop conducted by the Texas Division of Emergency Management.

Ayers Street Pedestrian Improvements and Turn Lane Addition, from SPID to Gollihar, Bond 2014 – City of Corpus Christi, TX (2016 – current): Prepare the technical specifications and utility matrix, and perform constructability review. Project consisted of widening approximately 3,000 linear feet of Ayers Street from approximately SPID to Gollihar Road to accommodate the addition of a continuous center dual turn-lane, and provide pedestrian and drainage improvements.

Alameda Street – Lipan to Kinney, Bond 2014 – City of Corpus Christi, TX (2016-current): Provide construction phase services. The project consists of full-depth asphalt roadway reconstruction with curb and gutters, driveways, sidewalks, ADA curb ramps, pavement markings, signage, storm water drainage, and utility improvements.

Bulk Terminal Storm Water System Quality Improvements, Project 15-046A – Port of Corpus Christi, TX (2016-current): Prepare the technical specifications and perform constructability review. The project consists of restoring the capacity of the public storm water detention ponds, storm water infrastructure modifications to the existing storm water filtration system at the bulk terminal, including removing and replacing concrete channels, adding weirs, headwalls, retaining walls, slabs, weirs, ramps, storm pipes, and inlets, utility relocations, and pavement, curbs, site grading improvements.

Northeast Transmission Line Program (over 90 miles and over \$500M of large diameter waterlines up to 108-inch diameter) – City of Houston, TX (2015-current): Responsible for preparing a cost model for the program, TxDOT tunnel permit assistance, specification assistance, assistance with unique details, presenter on constructability issues at workshop hosted by the City, and performed constructability reviews on the following initial projects in the ongoing program.

- **WBS No. S-000900-0126-3 (Contract 99B-2), \$29.0M - 108-inch Water Line Along City Easements from Smith Rd. to Lee Rd.** – This project primarily consists of construction of 108-inch large diameter water transmission line, public utility adjustments, access road with a detention pond and construction of one (1) 42-inch and one (1) 54-inch Interconnection from the proposed 108-inch water line to existing 42-inch and 66-inch water lines, respectively. The proposed 108-inch water line will be tunneled under a TxDOT bridge, Union Pacific Railroad tracks, Harris County Flood Control District Channel and existing roadways.
- **WBS No. S-000900-0156-3 (Contract 99C-1), \$20.5M - 108-inch Water Line Lee Rd. to Vickery Dr.** – This Project primarily consists of constructing a 108-inch and 54-inch water transmission line, a 12-inch waterline, a 16-inch waterline, roadway reconstruction including drainage replacement along with sidewalk construction and replacement on

portions of Crosswinds Blvd. and Aeropark Dr. Construction of the proposed 108-inch water line includes connections to the other NETL “work around solution” projects: a proposed 108-inch water line and a proposed 54-inch water line (by others), and also includes various public utility adjustments.

- **WBS No. S-000900-0140-3 (Contract 99B-1) \$31.3M - 108-inch Water Line Along City Easements from East of Bellow Falls Ln to Smith Rd** – This Project primarily consists of construction of 108-inch large diameter water transmission line, public utility adjustments and one (1) 60-inch interconnection from the proposed 108-inch water line to the existing 84-inch water line.

Main Canal Siphon at IH-10 Slope Failure Repair – Coastal Water Authority, Baytown, TX (2016): Construction Manager responsible for construction management and inspection services on a critical slope failure repair to the raw water canal on the slope immediately above three 108-inch PCCP siphons crossing under Interstate Highway 10.

Surface Water System Improvements Program – City of Conroe, TX – Water Plants Project (2014-2016): Construction Manager responsible for construction management and inspection services for modifications to 6 existing ground water pump plants to accept surface water from the SJRA’s new surface water treatment plant, including 3 new natural gas emergency generators, construction of a new pump building with new pumps and chlorine system and new and refurbished pumps at 5 existing pump facilities, including new post chlorination systems, including associated electrical, SCADA and security modifications. Work is scheduled and sequenced in phases to avoid service disruptions.

Surface Water System Improvements Program – City of Conroe, TX – Water Distribution System Project (2015- 2016): Construction Manager responsible for construction management and inspection services on 4 new pressure reducing valve facilities, 4 new emergency service valve facilities, with new precast buildings for each facility, and 3 new small diameter waterlines, including chlorine analyzers, associated electrical, SCADA and security. Improvements are necessary to receive surface water from the SJRA’s new surface water treatment plant.

John developed and prepared an initial draft of proposed procedures and test report forms for disinfection and hydrostatic testing of waterlines which is still under review by the City.

Groundwater Reduction Program – San Jacinto River Authority, Montgomery County TX (subconsultant to KBR) – 60-inch & 54-inch Waterlines, Project T1, Project T2 & Project T3, and South Receiving Facility Project (2013-2015): Provided design phase constructability reviews, permitting

assistance, cost estimating, and committee member for the competitive sealed proposal selections.

John provided construction management and inspection services for 3 concurrent large diameter waterline projects totaling approximately 12 miles of 54-inch and 60-inch waterlines, including 25 tunnels crossing dam spillways, TxDOT highways, railroads, creeks, gas pipelines, golf cart tunnel, and numerous roads, including impressed current cathodic suppression systems and fiber optic conduits and pull boxes.

John also provided CM&I services on the south facility project concurrent with the waterline projects, which included various improvements at seven water plants consisting of new small diameter waterlines, new buildings, ground storage tank modifications, chlorine systems, control systems, electrical modifications, new emergency generator systems, and new water line pressure and flow control stations.

John developed and prepared the initial draft of proposed procedures and test report forms for disinfection and hydrostatic testing of all of the waterlines in the program that was ultimately edited and implemented.

Surface Water Transmission Program (SWTP) – City of Houston, TX (2000 - 2015): Since 1985, LAN has provided planning, design, Program Management and construction management and inspection services to convert from groundwater to surface water to reduce the effects of subsidence. The City’s \$400 million SWTP Program which has provided more than 250 miles of transmission and distribution mains up to 96-inches in diameter. As part of this program, LAN has managed, designed, coordinated more than 100 engineering design projects, including water system analysis and design, water treatment facility and pump station design, ground storage and well system design, open cut, tunneling, aerial pipe crossings, railroad crossings, waterline rehabilitation using trenchless technology, and the construction management and inspection for each project. The City of Houston estimates LAN’s involvement has saved \$40 million to date.

John has worked on many of these projects (including concurrent while managing other projects), providing services ranging from route analysis, site investigations, condition assessments, constructability reviews, cost estimates, cost models, specification preparation, permitting, construction phase services, butterfly valve witness testing, with the majority being construction management and inspection services. Some of these projects also included improvements and additions to numerous water plant pump stations, pressure reducing valve stations, air relieve valve rehabilitation, and other facilities. All of these projects typically included public and private utility relocates, drainage modifications, concrete and asphalt pavement removal and replacement, tunnels, aerial crossings, impressed current cathodic protection

systems, disinfection and hydrostatic testing, interconnections, etc. See partial list of projects and services listed below.

Staff Augmentation Project Management Services, Construction Branch, Public Works City of Houston, TX (2004-2006): John was a project manager responsible for LAN's staff physically located in the Public Works building augmenting the City's construction project managers. John was responsible for managing multiple projects in various stages of construction as an acting City Project Manager. As an acting City Project Manager John was responsible for directly managing projects as well as managing projects managed by other consultant construction managers. John also assisted the City with various other tasks and services such as perform constructability reviews on numerous projects, participate on committees to improve existing and add new modules in the City's web based construction management system called CIPMS, perform independent peer review of claims and disputed issues for other City PMs, worked with the City's Construction Branch senior assistant director, supervising engineer, and the City attorney in preparing and executing the first ever debarment of two contractors and their key principals by the Public Works Department. John's responsibilities also included coordinating with various City departments, North Harris County Regional Water Authority, permitting department, City surveyors, City utility maintenance, City plant operators, the City's geo-environmental group, various design and construction management consultants, laboratories, TxDOT, Harris County, private utilities, Harris County Flood Control District, various management districts, Sureties, City Legal, City Real Estate, Council Members, the public and various other stakeholders.

The following is a brief list of some of the SWTP projects John worked on and his role (see footnote for John's roles).

- (1) City PM – Staff Augmentation
- (2) LAN Design Phase Services
- (3) LAN CPS Services
- (4) LAN CM Services

* Independent peer review of major \$1M+ claim only

- Water Main Replacement Near Northside (1*)
(GFS# S-0035-NN-3) \$2.6M (2002-2003)

- 48" WL along Alameda from N. MacGregor to Holcombe Blvd, and along Holcombe Blvd. from Alameda to Cambridge (1, 4)

- 54" WL along Dolly Wright from W. Montgomery to Acres Home Pump Station, and Pump Sta. Improvements (1) (GFS# S-0900-A9-3) \$4.6M (2006-2006)
- 42" WL along Tidewater, South Post Oak, W. Orem, Croquet from Candleshade to Sims Bayou Pump Station (3, 4) (GFS# S-0900-B7-4) \$8.5M (2010-2011)

Greenspoint Water Line Program, Construction Management and Inspection Services – City of Houston, Houston, TX:

John was initially the consultant Project Manager for construction management and inspection team and subsequently the acting City PM of 45,000 LF of 66-inch transmission mains and 5,000 LF of 8- and 12-inch distribution lines on a fast-track schedule to meet an EPA mandate. Due to the EPA's deadline, it was necessary to take a proactive approach to design and construction of this project. This program required extensive coordination with numerous high profile stakeholders, significant traffic management efforts, several critical tunnels, significant utility relocations, and pavement removal and replacement. The project was completed on time, in 18 months, and under budget by \$2.3 million.

Almeda Sims Sludge Processing Facility, City of Houston, Houston, TX – \$38M including dryer equipment (2006 – 2009):

John was the construction manager for the new sludge processing facility that consisted of new metal building to house the 2 new dryer units, 2 new belt filter presses, 1 remanufactured belt filter press, 3 refurbished belt filter presses, polymer feed system, sludge feed system, sludge day tanks with aeration system, cake conveyance system, water booster pump system, HVAC, plumbing, electrical, fire suppression and alarm system, SCADA, control room, offices, elevators, and a new truck load out building and 2 concrete silos, truck scales, stair tower, and a new TWAS pump station and new NPW pump station. The project encountered numerous significant unforeseen and differing conditions, acts of god, contractor deficiencies, and design modifications, including significant unforeseen contaminated soils, delays due to hurricane. John successfully utilized and issued numerous work change directives that helped to minimize the cost and schedule impacts associated with these various challenges.

HVAC Improvements at Electrical Buildings at the Water Treatment Plant and Industrial Pump Station – Gulf Coast Water Authority, Texas City, TX – \$295k (2012 – 2012):

John took the lead at the 90% design stage to assist the EOR in splitting out the contract documents into alternate bid, prepare the front end documents, and assist with advertising, bidding and award. John also provided construction phase services and was the construction manager. The project required the replacement of the existing HVAC equipment in the electrical buildings at the water treatment plant and the industrial pump station which provides raw water to numerous petrochemical refineries. The work was successfully scheduled, sequenced

and managed to avoid service disruptions to the public and refineries.

New Flow Meters, Vaults, Radio Antennas and Solar Panel Systems for Various Raw Waterlines – Gulf Coast Water Authority, Texas City, TX – \$916k (2013 – 2013):

John took the lead at the 90% design stage to assist the EOR in completing the design for multiple proposed flow meters, vaults and radio/solar power systems on existing raw water lines servicing multiple petro chemical refineries. The vaults were located inside and outside of the refineries. John coordinated closely with the refineries to perform extensive SUE investigation to locate the various buried gas pipelines, utilities and raw waterlines to determine where the proposed flow meter vaults could be safely located, as well as coordinate with the local electrical company to determine where the proposed precast concrete utility poles for the radio antennas and solar panels could be located so they wouldn't conflict with the numerous overhead power lines.

Kimberly Drainage Project - TIRZ 17, Houston, TX: John was the construction manager on this project located in the highly urbanized Memorial City Mall area, which consisted of slip lining a 54" sanitary sewer, installation of a temporary by-pass system, installation of dual reinforced concrete box culverts, new waterlines, new signalized street lights, new concrete pavement, concrete pavers, sidewalks, handicap ramps, driveways, decorative street lights, and landscaping.

Projects – Hensel Phelps Construction Co.

International and Special Projects; San Jose, California (1997-1998): John was part of the corporate team selected to begin a new division to pursue international and special projects. His responsibilities varied from estimating (hard bid and conceptual) to developing new systems, forms, and procedures to overseas site visits to meet with potential clients, local officials, business leaders, contractors, and architects.

Engineering School, MP Training Facility, Chemical Defense Training Facility, Museum, Barracks, Dining Halls, Soccer Fields, and Officer Housing—US Army Corps of Engineers, Fort Leonard Wood, Missouri (1996-1997): As Senior Project Engineer, John provided guidance to four project engineers and was responsible for setting up the contractor's management systems for all the projects. John was directly responsible for the engineering school, officer housing and soccer fields which included management of contractor's staff, laborers, equipment and materials, as well as managing the subcontractors and suppliers.

Barracks, Dining Halls, Central Plant, Roads, and Utilities—US Army Corps of Engineers, Fort Huachuca, Arizona (1992-1993): John was a field engineer responsible for performing the engineering, drawings, surveying, and construction layout and verification for the civil portion of the project. His responsibilities required reviewing the contract drawings and

specifications, as well as the product data, shop drawings, and field conditions in order to develop construction layout drawings which included all components necessary to comply with the contract documents. John also managed the geotechnical testing lab, all heavy and light construction equipment, material suppliers, and a 10-man crew of operators and laborers for all civil work.

Semiconductor Facility Program—Samsung Corporation, Austin, TX (1995-1996): John had dual responsibilities as a member of the construction management team, and as a member of the contractor team constructing the main semiconductor building. John was the senior project engineer responsible for setting up the management information systems for the design-build fast-track \$330M program for the construction management team and coordinated with the client, design team, and contractors. Contractor team responsibilities included management of staff, laborers, equipment, and materials, as well as managing the subcontractors and suppliers. John also conducted progress meetings, pay estimates, RFIs, submittals, change orders, and managed project schedule and costs.

Wastewater Treatment Plant—US Army Corps of Engineers, Holloman, New Mexico (1996): John was brought in to perform a complete audit of the contractor's and independent testing lab's daily reports, inspection records, and test reports to determine if all contractually required testing was performed. The audit was due to a government investigations as a result of allegations made by a disgruntled former employee. John's detailed extensive audit determined that some tests were inadvertently not performed, but there was no willful intention to save money or cut corners by not performing the tests. The contractor proposed corrective fixes for the tests that were not performed. The government investigation agreed with John's findings and with the contractor's proposed fixes.

South Oak Cliff Line Segment 1 and West Oak Cliff Line Segment 1—Dallas Area Rapid Transit (DART), Dallas, TX (1994-1995): John was the project engineer on a new light rail system, including train stations. His responsibilities included management of contractor's staff, laborers, equipment and materials, and subcontractors and suppliers. John also worked closely with the bonding company for the specialty light rail subcontractor to complete the projects.

Light Rail-Service and Inspection Facility—DART, Dallas, Texas (1993-1994): John was the chief field engineer on a large complex service and inspection facility. He was responsible for managing the field engineering staff to perform the engineering, drawings, surveying, and construction layout and verification. John's responsibilities required reviewing the contract drawings and specifications, as well as the product data, shop drawings, and field conditions to correlate the various design disciplines in order to develop a consolidated set

of construction layout drawings which included all components necessary to complete the work such as the numerous complicated pits for the various equipment that would service the trains, erect the various structural steel buildings, layout the complex rail tracks in the rail yard, the various utilities, driveways, parking lots, etc.

Research Asst. & Internship – Grad. School

University of Texas, College of Civil Engineering and Construction Industry Institute (CII), Austin, TX (1990-1991):

While a graduate student in the Construction Engineering & Project Management program in the College of Civil Engineering, John was a graduate research assistant to the director of the program (Dr. Richard Tucker, P.E.) who was also the director of the CII. One notable project John assisted with while working at CII was researching and drafting the introduction and several chapters for the CII director, and reviewing/editing the remaining chapters prepared by professors from other universities, and compiling, formatting and preparing the TOC, chapters, exhibits, appendices and index for a publication funded by the National Science Foundation on the Japanese construction industry.

This work and research led to a graduate student internship opportunity with one of the largest Japanese full-service engineering, land development, and construction companies, the Taisei Corporation, in their Research & Development Division located in their corporate headquarters in Tokyo, Japan. John worked directly with their engineering researchers and scientists on the various construction methods and materials they were researching and developing. This research also included numerous site visits to various active construction project sites around Japan, ranging from several mid-rise office and residential buildings, to a highway tunnel project crossing under a bay constructed of precast concrete box segments, to several mega airport projects including the expansion/renovation of the Haneda Airport, and construction of the manmade island and connector bridge in Osaka Bay for the totally new Kansai International Airport. This research also included touring the research and development facilities of not only Taisei, but also the facilities of one of their major competitors, the Kajima Corporation, where new methods and materials were tested and developed.

Projects – Carpenter's Helper

Residential and Small Commercial Projects, Various Clients, Corpus Christi, TX (1975-1988): John worked on various residential and small commercial projects as a carpenter's helper and estimator on weekends and summer breaks starting in seventh grade and through college. Projects were primarily small private residential additions and remodels, with a few small office renovations, dentist office renovation, renovation of several low income government housing units, and volunteer work to build various shelters and structures for a Boy Scout camp.

Which Boards would you like to apply for?

AIRPORT BOARD: Submitted

WATERSHORE AND BEACH ADVISORY COMMITTEE: Submitted

MAYOR'S FITNESS COUNCIL: Submitted

Interests & Experiences

Are you a registered voter?

Yes No

Do you currently serve on any other City board, commission or committee at this time? If so, please list:

No

Education, Professional and/or Community Activity (Present)

I have a Bachelors Degree in Communication and I have partnered with CASA of the Coastal Bend to serve as their spokesperson at certain event through out town.

If you applied for multiple boards, which boards are you most interested in serving on, in order of preference? (Limit to top three)

Air Port Board,

Why are you interested in serving on a City board, commission or committee?

I'm new to the community and as an Evening Anchor for KRIS 6 News I feel it's important for me to be involved in my community. I was born in Corpus Christi and love this area. I would like to be a part of an organization doing great things for the community.

Are you an ex-Officio member of a City Board, commission or committee?

Yes No

Demographics

Gender

Male

Code of Ethics - Rules of Conduct/Conflicts of Interest

Do you represent any person or organization in any claim or lawsuit or proceeding involving the City?

Yes No

Do you, your spouse, your business or your spouse's business have a City contract?

Yes No

Does your employer or your spouse's employer have a City contract?

Yes No

Are you involved with any activities or employment that would conflict with the official duties on the City boards for which you are applying?

Yes No

Are you, your spouse, your business or your spouse's business involved in any pending bid, proposal or negotiation in connection with a contract with the City?

Yes No

Do you or your spouse have a pending claim, lawsuit or proceeding against the City?

Yes No

If you answer "Yes" to any of the questions above, please explain or ask to speak with the City's Legal Department.

I'm a registered voter

Board-specific questions (if applicable)

Question applies to MAYOR'S FITNESS COUNCIL

The Mayor's Fitness Council must include representatives from certain categories. Do you qualify for any of the following categories? *

Youth Initiatives

Question applies to WATERSHORE AND BEACH ADVISORY COMMITTEE

The Watershore & Beach Advisory Committee must include members representing certain categories. Do you qualify for any of the following categories? *

None of the above

Verification

City Code Requirement - Residency

As a board, commission, or committee member, you will be asked to adhere to City Code of Ordinances, Section 2-65, which states that all members of City boards and commissions, including ad hoc committees, appointed by the City, must be residents of the city. A move outside the city limits of the city by any member shall constitute automatic resignation from the particular board or commission on which such member served.

I Agree

City Code Requirement - Attendance

As a board, commission, or committee member, you will be asked to adhere to City Code of Ordinances, Section 2-61, which provides that absences from more than 25% of regularly scheduled meetings during a term year on the part of any board, commission, or committee member shall result in an automatic termination. An absence shall be deemed unexcused unless excused by the board, commission or committee for good cause no later than its next meeting after the absence.

I Agree

Consent for Release of Information

I understand that if any member of the public makes a request for information included in this application or in any attachment (e.g. resume or supporting documentation) for appointment it is subject to and must be disclosed under the Texas Public Information Act. I understand that under the Texas Public Information Act, my home address and home telephone number is subject to public disclosure unless I am elected or appointed to the position which I seek. I hereby consent to the release of my home address and home telephone number should it be requested under the Texas Public Information Act prior to my possible appointment or election. I hereby release the City of Corpus Christi, and its agents, employees and officers, from any and all liability whatsoever if the information must be released pursuant to the Texas Public Information Act.

I Agree

Oath

I swear that all of the statements included in my application and attached documents, if any, are true and correct.

AWARDS

Texas AGC / TxDOT Design Award (2004)

A&W Highway Contractors, 11400 South at I-15 Design Build, Salt Lake City, UT

Construction/reconstruction of 11400 South from 3600 West to State Street (US-89); northbound and southbound I-15 auxiliary lane construction from 11400 South to 10600 South; an overpass over the UPRR/UTA railroad Right of Way at approximately 400 West; and a large overpass bridge structure to accommodate a single point urban interchange (SPUI) at I-15 and 11400 South. Mr. Saldivar designed a segment of the 11400 South road and provided design support for the I-15 corridor and SPUI. He had oversight of horizontal and vertical geometry and design cross-sections. He also coordinated the roadway design with multiple discipline teams that included structures, drainage, utility conflicts/relocation, proposed utilities, right of way acquisition, MOT (maintenance of traffic), signing, striping, and signal layouts.

Role: Roadway Task Leader

A&W Highway Contractors, 11400 Interchange; State Street to Bangerter Highway Reconstruction, Salt Lake City, UT

HDR assisted Ames Construction with the development of preliminary engineering (concept and feasibility) design plans for a five-mile section of roadway to be upgraded from a two-lane facility to a five-lane roadway, and a two-mile section of freeway, including the construction of a new single-point urban interchange (SPUI).

A&W Highway Contractors, I-15 New Interchange at 11400 South Design-Build, Salt Lake City, UT

Mr. Salvidar led a team to design the improvement of 11400 South from a rural section to an urban boulevard section for three miles. In addition, he assisted in developing geometry for the single-point urban interchange (SPUI). Responsibilities included overseeing geometry, utility relocation, right-of-way acquisition, retaining wall, drainage, signing, striping, MOT, and cross-section development. Sam was involved with developing the "footprint" for the project which delineated the ROW needs for all parcels abutting the project limits. The project also won an award from DBIA - Rocky Mountain Region in 2011.

Role: Roadway Segment 1 Lead

Date: 08/2011

City of Corpus Christi, TX, 2008 Bond Program Assistance, Corpus Christi, TX

Provided preliminary engineering services to develop the scope, budget and schedule for 11 individual street projects as part of the CIP and Bond 2008 Issue

projects. These projects were each estimated to cost \$10 to \$12 million and required reconstruction to meet the City of Corpus Christi's Urban Transportation Plan. The projects included a full compliment of improvements to the utilities, storm water drainage, and roadway.

Role: Design Engineer

Date: 10/2008

City of Corpus Christi, TX, Airline Road Improvements, *Corpus Christi, TX*
Bond 2008 improvements to Airline Road between Saratoga Boulevard and Rodd Field Road. Project consists of upgrading the existing two-land rural road without shoulders to a five-lane urban road with curb, gutter, and sidewalks. Also included utility upgrades and repairs (water, wastewater, gas) and significant stormwater improvements, as well as traffic signalization and area lighting improvements.

City of Killeen, Texas, FM 2410 and US 190/Rosewood Dr. Overpass Project, *Killeen, TX*

HDR prepared the application for the Pass-Through Finance Plan for improvements to three separate roadways including Farm to Market (FM) 2410, extension of Rosewood Dr and a new US 190/Rosewood Dr grade-separated interchange. The application was successful and HDR prepared Categorical Exclusion (CE) environmental documentation for the FM 2410 portion of the project and plans, specifications and estimate (PS&E) package for the FM 2410, US 190/Rosewood Dr overpass and Rosewood Dr extension. These plans included acquisition of right-of-way, signing, pavement markings, traffic control, erosion control, pavement assessment and design, utility coordination and field surveying. In addition, due to the proximity of the project to Skylark Field Airport, FAA Form 7460-1 Notice of Proposed Construction or Alteration was prepared and submitted for both construction activities as well as the proposed final design.

Role: Roadway Lead

Date: 02/2015

City of Pflugerville, Pflugerville Parkway (Eastern Segment), *Pflugerville, TX*
HDR was selected to provide schematic design and final plans specifications and estimates to upgrade a five mile segment of the 2 lane roadway to a 4 lane divided arterial roadway. The project incorporates TxDOT criteria based on the 4c funding provided by CAMPO. Additionally, HDR provided traffic warrants, and signal, roadway, and stormsewer design.

Date: 06/2004

City of Round Rock, Arterial Storm Water Pump Station Preliminary Sizing, *Round Rock, TX*

Provided services related to the design of an underpass for the City of Round Rock Arterial A under the Union Pacific Railroad.

Date: 12/2001

City of San Antonio, Reed Road Improvements: Culebra to Military, *San Antonio, TX*

HDR provided preliminary engineering and final design services for the Reed Road: Culebra to Military project, a \$6.1M project to reconstruct and widen approximately 5,800 feet of roadway from a two-lane non-curbed section to three lane section to include left turn lanes, bicycle lanes, curbs, sidewalks, driveways, underground storm drain system and traffic signals. The scope of services included preparation of a Preliminary Engineering Report that outlined the controlling design criteria and set vertical and horizontal alignment allowing the right of way needs to be

determined. Final design services included preparation of plans, specifications, and estimates.

Date: 09/2010

Fort Bend Grand Parkway Toll Road Auth., Grand Parkway SH 99 Segment D Section 2 (New Territory Overpass), Sugar Land, TX

Responsible for the design of PS&E of Section 2 of Segment D which included the overpass at New Territory Blvd. and two bridges over Ditch "M" south of New Territory Boulevard. The project also included the design of the main-lane pavement geometrics, 9 retaining walls, SWPPP, and construction cost estimates for the project along the SH 99 (Grand Parkway) corridor.

Date: 00/2014

Gignac Associates, Chaparral Street Improvements, Corpus Christi, TX

See PM

Date: 07/2014

HDR Engineering, Arterial A Alignment (SA as sub to Austin), Austin, TX

The City of Round Rock Public Works Department contracted HDR's Austin office to prepare plans, specifications, and estimates for a new alignment of a 6-lane major arterial divided roadway. The project limit was from Joe DiMaggio Boulevard to Forest Creek Drive, totaling 1.14 miles. Project elements included retaining walls, storm sewer system, Chandler Creek Bridge and Brushy Creek Bridge and a railroad bridge over Arterial A. The San Antonio office assisted with preparing plans for drainage, SW3P, traffic control plans, signing and striping.

Role: Transportation Engineer

Date: 02/2008

HDR Engineering, U.S. Army Corps of Engineers - Fort Worth ECSO IDIQ, Rio Grande Valley Border Fence, engineering subcontract

This project entailed providing metes and bounds surveys and legal deed descriptions associated with the proposed "Border Fence". The project limits included Starr, Cameron, and Hidalgo Counties.

Role: Project Manager

NAVFAC Southeast, NAVFAC SE IDIQ, Basewide Signage Field Inspection and Design, Corpus Christi Naval Air Station, TX

HDR helped the Navy achieve signage uniformity and consistency by conducting field work to catalogue and inventory existing signs. Five engineering plan sets were prepared for sign replacement.

Role: Project Manager

Date: 10/2010

Port Authority of San Antonio, TIGER Grant Application, San Antonio, TX

Mr. Saldivar coordinated communication between the Port of San Antonio, HDR, and Pape-Dawson. He led the team in laying out horizontal geometry, planning conceptual drainage improvements, opinions of probable cost, and project schedules for a preliminary engineering plan and estimate of probable cost for TIGER grant application.

Role: Project Manager

Date: 09/2009

TxDOT- Dallas District, US 75 Reconstruction, McKinney, TX

The HDR Team designed 3.3 miles of the reconstruction of US 75 through McKinney, Texas including two diamond intersections, one single point urban

interchange, eight mainlanes, new ramps and new frontage roads.

TxDOT- El Paso District, Evergreen 2006, El Paso, TX

HDR was selected by TxDOT - El Paso for a two year evergreen contract. One Task Order has been issued for the rehabilitation of IH-10 in El Paso County. This project is the rehabilitation of 4.77 miles of existing east- and west-bound frontage roads. The work is overlay, mill and inlay, and base repair to be done at specific locations as designated by TxDOT. The project also included rehab of 0.84 miles of mainlanes and base repair and resurfacing of one exit ramp.

Role: Project Manager

Date: 07/2008

TxDOT Houston District, TxDOT Houston IH 45/IH 610 Direct Connector TxDOT Houston, Houston, TX

HDR prepared PS&E for IH45 south to IH610 east direct connector, SH35 south connector, IH45 bridge widening at Woodridge, IH610 bridge widening at Telephone and IH610 bridge widening at Broad and IH610 widening for approximately 2.5 miles.

Date: 00/2014

TxDOT- Pharr District, Border Safety Inspection Facilities, Pharr, TX

HDR was selected for the development of Border Safety Inspection Facilities, which will provide the needed safety inspection of trucks at the Port of Entry while providing for optimum through put of the inspected trucks. Key project elements are inspection bays, roadway elements, queuing areas, parking areas, weight-in-motion (WIM) scales, support buildings and coordination of facilities with the INS using Intelligent Transportation Systems.

Role: Transportation Engineer

Date: 06/2009

TxDOT- San Antonio District, Planning Evergreen, TX

Task Order 1- SH16/SH46: The project consisted of designing a conceptual intersection layout that upgrades an existing 4-lane undivided highway with at-grade intersections to a 4-lane divided highway with a grade separation at the intersection of SH16 and SH46. Allowance for future lanes was included. HDR provided horizontal and vertical alignments, ROW impact analysis, retaining wall analysis, matrix outlining the options for alignments, construction cost, and ROW impacts/costs.

Role: Project Engineer

TxDOT- San Antonio District, US 281 - Loop 1604 Revisions, San Antonio, TX

HDR designed the revised geometric alignments to allow for the addition of proposed tolled managed lanes along Loop 1604 and direct connectors that feed traffic into and out of the proposed managed lanes of Loop 1604 onto the proposed general purpose main lanes of Loop 1604 and US 281, as well as the proposed tolled main lanes along 281 N. HDR provided associated cost estimates and constructability reviews for each of the proposed eight direct connecting bridge structures and approach roadways.

Role: Transportation Engineer

Date: 01/2008

TxDOT- Waco District, US 190 Reliever Route, Copperas Cove, TX

The HDR Team will design the US 190 Bypass around Copperas Cove, Texas. The project is a new location and will include engineering a four-lane freeway with grade

separations. The design will consist of freeway mainlanes, cross street bridges, entrance ramps, exit ramps and the moving of an existing landfill from the right of way of the proposed bypass.

USPS, USPS WO #4 - Cedar Elm Paving, San Antonio, TX

HDR was responsible for the redesign of the existing layout of the Cedar Elm Postal Facility. This included revising the site layout to accommodate increased traffic loads, circulation plan, drainage design, site grading, ADA compliance, demolition and cost estimates.

Date: 07/2008

NON-HDR EXPERIENCE

Kostoryz Road Widening, Corpus Christi, TX

Widened 2 lane urban road with roadside ditches to a 5 lane curb and gutter section. Designed Vertical Alignment. Performed Hydrologic Analysis for contributing drainage areas. Designed the curb and gutter storm system. Designed the Design Cross-Sections and calculated earthwork volumes.

Role: Engineer In Training

SH 286/ SH 358 Interchange

Upgrade existing interchange from 3 legs to 4 legs with direct connectors and clover leaf ramps. Designed storm sewer system for interchange. Designed grading layouts. Designed horizontal and vertical alignments for minor roadway sections. Designed soil nailed wall layouts.

Role: Engineer In Training

SH 35

Upgrade a rural 2 lane road to a rural 4 lane divided. Designed the Pavement Structure. Designed the striping layout and calculations.

Role: Engineer In Training

SH 89

Design of rural 4 lane divided highway with 8 grade separations. Designed vertical and horizontal alignments, designed cross-sections & earthwork volumes, coordinated hydrology & hydraulics. Oversight of traffic control plan, bridge layouts, P&P sheets, and retaining wall layouts.

Role: Project Manager

US 181 Phase 2

Widen a 4 lane divided to a 6 lane freeway facility with overpasses. Designed Striping Layout and Calc's. Designed curb and gutter storm sewer for frontage roads. Designed driveway pipes for side streets.

Role: Engineer In Training

US 181 Phase 3

Designed vertical and horizontal alignments for mainlanes and ramps. Created design cross-sections and calculated earthwork volumes. Oversight on drainage design. Designed traffic control plan. Oversight of SW3P.

Role: Project Manager

US 59 Super 2

Design of intermittent passing lanes from Beeville to Goliad. Managed total P.S.&E. Designed bridge class structure and traffic control plan. Oversight of P&P sheets, culvert structure sheets, SW3P sheets, striping and signing sheets, and design

cross-section work.

Role: Project Manager

US 77 Rehabilitation

Rehabilitate a 5 lane curb and gutter section. Designed the striping layout for the project and calculated associated quantities. Layout consisted of a five lane curb and gutter section which included a TWLTL and multiple school crossings.

Role: Engineer In Training
