City Secretary
City of Corpus Christi
1201 Leopard Street
Corpus Christi, Texas 78401

Dear Ms. Rebecca Huerta:

Pursuant to Article I, Section 4 of the Corpus Christi City Charter, this letter is to inform you that the undersigned individuals hereby state their intent to circulate petitions calling for the below initiative. With the exclusion of whereas statements, the initiative is as indicated below:

We, The People of the United States and Citizens of Corpus Christi, humbly petition the Corpus Christi City Council to redress and correct the grave injustices and the crimes against humanity related to Coronavirus Disease 2019 (COVID-19). Many in our medical community and the current Corpus Christi Nueces County Public Health District have failed to inform the public of and treat patients according to COVID-19 early treatment protocols that use safe, United States Food and Drug Administration (FDA) approved medicines. They have not ensured informed consent to experimental gene-transfer/therapy, while actively promoting COVID-19 shots and boosters. And, they have failed to inform the public of methods to improve individual immune systems and health.

BE IT RESOLVED: We urgently plead with you and pray to יהוה—The Creator of the Heavens and Earth and Elohim (God) of Avraham (Abraham), Yitzhak (Isaac) and Ya'aqov (Jacob)/Yisra'el (Israel) for the Corpus Christi City Council to adopt a city ordinance to promote, inform, and educate the public of COVID-19 early treatment protocols developed by experienced physicians effectively treating COVID-19 patients and used successfully by United States-based doctors and telemedicine physicians; to promote related risk reduction of SARS-CoV-2 infection and disease severity through prophylaxis measures; to inform and educate the public of ways to improve their immune systems with a healthy diet, dietary supplements and exercise with physician consultation; and require Corpus Christi hospitals, medical facilities, health care professionals and pharmacies to provide patients with information on COVID-19 early treatment protocols, and prescribe such medicines as Hydroxychloroquine, Ivermectin, Budesonide and other safe, FDA-approved drugs as suggested by such early treatment protocols.

The full petition for circulation, which includes supporting whereas statements, is attached.

Sincerely,

Samuel Aundrá Fryer

Initiative (Petition) to the Corpus Christi Mayor and City Council from the Citizens of Corpus Christi

To the Honorable Mayor and City Councilmen of the City of Corpus Christi:

We, The People of the United States and Citizens of Corpus Christi, humbly petition the Corpus Christi City Council to redress and correct the grave injustices and the crimes against humanity related to Coronavirus Disease 2019 (COVID-19). Many in our medical community and the current Corpus Christi Nueces County Public Health District have failed to inform the public of and treat patients according to COVID-19 early treatment protocols that use safe, United States Food and Drug Administration (FDA) approved medicines. They have not ensured informed consent to experimental gene-transfer/therapy, while actively promoting COVID-19 shots and boosters. And, they have failed to inform the public of methods to improve individual immune systems and health.

WHEREAS: There are inexpensive and effective early treatment protocols for COVID-19 developed by independent doctors, physician groups and associations—Dr. Vladimir Zelenko, the Front Line COVID-19 Critical Care Alliance, the Association of American Physicians and Surgeons, and other medical organizations—who have separated themselves from the mainstream medical system, which parrots after the pharmaceutical industry. Doctors world-wide and several United States-based telemedicine organizations used these protocols, preventing hospitalization and death; and

WHEREAS: Hydroxychloroquine and Ivermectin, two of the primary drugs used in the early treatment protocols, also demonstrate effectiveness as prophylaxis against Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) infection—thus, preventing COVID-19; and

WHEREAS: On September 3, 2021, a concerned and informed citizen emailed a request to the City of Corpus Christi Mayor, each Councilman, and the City Manager, subject: Call to Inform Corpus Christi Public and Medical Professionals & Facilities of Early Effective Treatment of COVID-19 and Preventing Hospitalization. The request was for the City Mayor, Councilmen, and Manager to review provided COVID-19 treatment information and three early treatment protocols from Dr. Vladimir Zelenko and the Front Line COVID-19 Critical Care Alliance. After their review, the citizen requested that the City Mayor and Councilmen inform the Corpus Christi public, their constituents, of these early treatment protocols and work with the Nueces County Judge and their Nueces County Commissioners Court counterparts to direct the Corpus Christi Nueces County Public Health District to work with the hospitals, emergency care facilities, and physicians to implement these early treatment protocols; and

WHEREAS: During public comments at the September 7, 2021 City Council Meeting, this same concerned citizen, three of his family members, and another Corpus Christi resident provided personal testimonies of how these COVID-19 early treatment protocols worked for them personally. They informed the City Council of the fact that the protocols address all five options for medicines and approaches against infectious diseases by reducing infection, reducing spread, reducing symptom severity, reducing hospitalization, and reducing death; whereas, the “vaccines” only reduce symptom severity. They informed the City Council of the various medicines used in the protocols, and listed several medical doctors who developed and use the early treatment protocols successfully. And, they requested that the City Council work with the

Initiative (Petition) to the Corpus Christi Mayor and City Council from the Citizens of Corpus Christi

County Judge and County Commissioners to inform the public of these early treatment protocols; and

WHEREAS: During public comments at the September 14, 2021 City Council Meeting, the concerned citizen shared comparative and supporting data consisting of case studies, clinical trials, and peer-reviewed publications for the efficacy of the safe, FDA-approved medicines used in the proposed early treatment protocols. The presentation used and information provided was from www.c19early.com, a real-time analysis of—at that time 929 studies that has currently grown to over 1,030 studies—related to COVID-19 early treatments. The citizen again asked that the City Council inform the public of these early treatment protocol; and

WHEREAS: There is a concerted effort to suppress factual information related to the safety and efficacy of drugs such as Hydroxychloroquine and Ivermectin in treating COVID-19 by not only misinforming the public, but censoring medical professionals, scientists, and others that attempt to inform the public; and

WHEREAS: Medical malfeasance is occurring throughout Corpus Christi with regards to hospitals, emergency care facilities, doctors, and other health care professionals failing to treat those who have contracted COVID-19 with safe, FDA-approved medicines such as Ivermectin and Hydroxychloroquine that when prescribed with other FDA-approved drugs as part of physician-developed early treatment protocols reduce symptom severity, hospitalization, and death; and

WHEREAS: The cost of administering Remdesivir is approximately \$3,120, and the cost of Regeneron monoclonal antibody infusion is approximately \$1,250—substantially higher than the inexpensive cost of medicines used in early treatment protocols; and

WHEREAS: Federal law (42 US Code § 300aa–22) absolves liability for pharmaceutical manufacturers of vaccines; and

WHEREAS: “The mission of the Corpus Christi Nueces County Public Health District is to prevent disease, disability, & premature death; promote healthy lifestyles; and protect the health & quality of the environment for all residents of Nueces County”; and

WHEREAS: After a face-to-face consultation with the Director of Public Health on September 14, 2021, the concerned citizen forwarded her the email message that he had sent to the City Mayor, Councilmen, and Manager on September 3, 2021, and included the presentation used during public comments for the early treatment studies derived from www.c19early.com website. In the email, the citizen stated: “By informing Corpus Christi and Nueces County citizens, physicians and hospital staff, and medical professionals throughout your area of responsibility with these early treatment protocols and related COVID-19 information, you will help change the trajectory of this pandemic; and

WHEREAS: The Corpus Christi Nueces County Public Health District continues to promote the use of COVID-19 gene-transfer/therapy shots, including booster shots, by Pfizer-BioNTech, Moderna and Janssen Pharmaceuticals, which are still under Emergency Use Authorization—

Initiative (Petition) to the Corpus Christi Mayor and City Council
from the Citizens of Corpus Christi

given the unavailability of the FDA-approved Pfizer-BioNTech COVID-19 shot brand named “Comirnaty” in the United States; and

WHEREAS: The Corpus Christi Nueces County Public Health District does not provide the public with information about adverse reactions—including high mortality—to the COVID-19 shots tracked in the Center for Disease Control’s Vaccine Adverse Events Reporting System (VAERS); and

WHEREAS: Many individuals receiving COVID-19 shots from the various COVID-19 vaccination clinics are unaware of information on reporting any adverse reactions using VAERS; and

WHEREAS: The Corpus Christi Nueces County Public Health District continues to promote the vaccination of children regardless of the extremely low mortality rate from COVID-19 infection, which is significantly lower than influenza, automobile accidents, drownings, cancer, heart disease, or suffocation; and

WHEREAS: The Corpus Christi Nueces County Public Health District is unable to present scientific and medical, peer-reviewed case studies or clinical trials that definitively prove that any of the COVID-19 shots reduce infection, spread, hospitalization, or death; and

WHEREAS: The Corpus Christi Nueces County Public Health District is not providing Health Education Information in any form to the public, citing on its official website “Due to COVID-19, our services have been suspended” when COVID-19 early treatment protocols should be provided, given the current pandemic; and

WHEREAS: The Corpus Christi Nueces County Public Health District fails to provide the public with the most elementary information about improving one’s immune system with a physician’s consultation by taking dietary supplements such as Zinc, Vitamin C, Vitamin D3, and Quercetin, which help reduce symptom severity; and

WHEREAS: The Corpus Christi City Council voted to break from the city-county health district and create the Corpus Christi Health Department.

BE IT RESOLVED: We urgently plead with you and pray to יהוה—The Creator of the Heavens and Earth and Elohim (God) of Avraham (Abraham), Yitzhak (Isaac) and Ya’aqov (Jacob)/Yisra’el (Israel) for the Corpus Christi City Council to adopt a city ordinance to promote, inform, and educate the public of COVID-19 early treatment protocols developed by experienced physicians effectively treating COVID-19 patients and used successfully by United States-based doctors and telemedicine physicians; to promote related risk reduction of SARS-CoV-2 infection and disease severity through prophylaxis measures; to inform and educate the public of ways to improve their immune systems with a healthy diet, dietary supplements and exercise with physician consultation; and require Corpus Christi hospitals, medical facilities, health care professionals and pharmacies to provide patients with information on COVID-19 early treatment protocols, and prescribe such medicines as Hydroxychloroquine, Ivermectin, Budesonide and other safe, FDA-approved drugs as suggested by such early treatment protocols.
