Topic	LOW BARRIER HOMELESS SHELTERS
Describe Feedback:	I am opposed to low (or no) barrier homeless shelters in Corpus Christi and the City staff's push for one. This is not a solution and presents additional issues, problems and costs for a City already severely burdened with its services and finances. In a study of a similar shelter, there were over 1000 additional police calls to the shelter in less than 2 years. It has not worked in San Antonio, San Francisco, Seattle, Louisville, etc. and the lack of success is a fundamental problem.

The City needs to support facilities and programs that provide a 'hand up'! Not a 'handout"! I suggest funneling the \$4 mm received to these type of programs to help the homeless and get them back to being a productive individual in society.

Do your homework and understand the issues, motivations and needs. Simply supporting a 'feel good' option to be politically correct is unacceptable for a leader of our City.

I am requesting that you vote against a low/ no barrier homeless facility in Corpus.

Topic	LOW BARRIER HOMELESS SHELTER
Describe Feedback:	I am against a low barrier homeless shelter. The problem is self sustaining so guidance is a means of teaching the skills to rise from the depths of despair. Handouts never work!! Tools must be provided and skills taught for people who don't know where to turn. With the grant that has been awarded to the city, someone who has been educated and demonstrated success in this area should be selected to develop a curriculum. Often

social workers have a "personal coach personality" and are able to connect with those wanting to make a change in their lives. Desire and pride are absolutely necessary.

In utilizing skilled personnel rather than individuals who believe in handouts, progress can be achieved. Self-pride is the basis for success. A facility where the homeless can seek refuge without supervision invites crime, filth, disease and the list goes on. As a former caseworker I have witnessed numerous situations in which people created a new way of life because they invested themselves.

Topic	Comprehensive Safety Plan Near Beach Piers/Jetties/Rocky Structures
Describe Feedback:	Fatalities & rescues have continued at our beaches & research tells us that dangerous rip currents persist around jetties, piers and rocky formations. These rip currents are known as Structurally Controlled Rip Currents. It is recommended that swimmers stay 100-500 feet from these structures in an effort to avoid being caught in a rip current. I am here to ask the City to consider a plan that

reinforces safety near jetties & piers. We lost our son in 2019 near a jetty. And, since we created the Je'Sani Smith Foundation to help drive rip current awareness. We have delivered messaging to beachgoers during high traffic seasons, invested in a billboard & PSA's with the support & donations from the Port of Corpus Christi & Nueces County. However, we need to find a more comprehensive solution to these Structurally Controlled Rip Currents. Let's work together to bring a solution & eliminate tragedies for our beachgoing community. Everyone deserves to return home after a day at the beach.

Describe Feedback:	Why are my phone calls to the Utilities NEVER answered, along with person to person visit to dispute bill charges. I realize that we are presently in a pandemic status and live visit are not possible but my concerns stem from WAY before the virus arrived. The Utility Department supervisor is really the person i would like visit with, with documents (bills) in hand. So whenever possible i would like set

up a date for a meeting, that's why the above date reads 11/05/2020. thank you.
