# Project Location

# Project Scope

The TxDOT HSIP provides grant funding for 90% of the construction costs of highway safety projects aimed to eliminate or reduce the number of severe traffic collisions. Under this program, the local government entity is responsible for all other costs such as design, right of way, permitting, TxDOT administrative fees, and construction change orders. HSIP funding provides for construction costs with a 90/10 funding participation by State (TxDOT)/Local Governments (City of Corpus Christi), respectively. The HSIP grant requires that the construction project be advertised and awarded by TxDOT.

In May 2021, City received the TxDOT HSIP grant for five projects locations:

- Gollihar Road from Mustang Trail to Pennington,
- Gollihar Road from Pennington to Meadowbrook,
- Alameda Street from Rossiter to Sinclair, and
- Alameda Street from Sinclair to Ropes
- Yorktown from Dallas to Yorkshire Drive

The scope of work is installation of the following school zone improvements: advanced warning signals, signs, raised median, and advanced warning signals delineators. The total estimated cost for the projects is \$178,542.79 for which TxDOT is responsible for this project total up to a maximum \$134,120.60 and with City's estimated cost to be \$38,206.60. The City design contract and internal staff efforts decrease the City's contribution to TxDOT by \$14,000, leaving the City's contribution to TxDOT to \$24,206.60.

# Project Schedule

---

This item will authorize approval of the AFA with TxDOT for their grant funds. Upon approval of the AFA, the project will be advertised for bidding by TxDOT in June 2023.
