Subject: FY 2024 Grant Application Decision Letter

Dear Mahogany Garza,

Thank you for applying for the Pipeline and Hazardous Materials Safety Administration's (PHMSA) fiscal year (FY) 2024 Natural Gas Distribution Infrastructure Safety and Modernization (NGDISM) Grant. The review process for grant applications received for the FY 2024 funding cycle has concluded. We received a significant number of high-quality applications, making the selection process extremely competitive. PHMSA is delighted to inform you that at least one or more projects within your application have been selected for funding in the amount of \$4,203,066.87.

Our team is here to assist you throughout the project implementation phase. In the upcoming weeks you will receive further communication regarding the next steps in the process which is the completion of a Tier 2 Site Specific Environmental Assessment (Tier 2 SSEA). In the interim, if any contact information for the Authorized Representative or your primary Program Official has changed, please submit an update to PHMSAPipelineBILGrant@dot.gov.

For the projects not selected, we encourage you to consider applying for future NGDISM grant opportunities. Please find the funding status of projects attached.

Congratulations on being selected for funding; we look forward to working with you to enhance the safety of your natural gas distribution infrastructure.

Sincerely,

A handwritten signature in blue ink that reads "Shakira N. Mack".
