

# **Service Agreement with Bellingham Marine for the Replacement of Two Floating Docks in the Corpus Christi Marina at Cooper's Alley L-Head**

City Council Meeting  
February 25, 2025

# Background

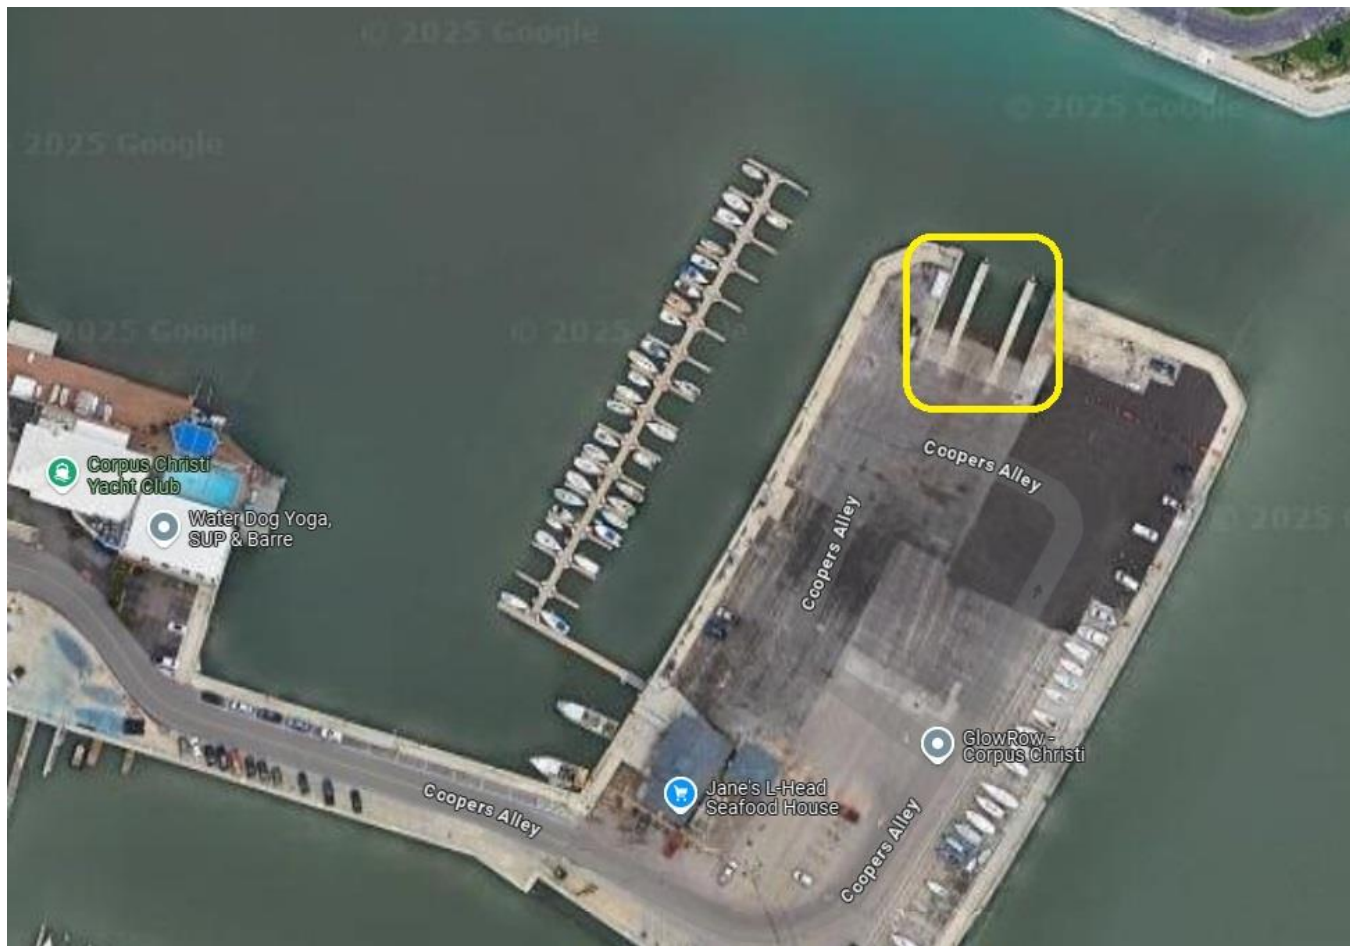

---

- The Corpus Christi Marina is a year-round tourist attraction as one of the largest marinas on the Gulf Coast.
- Cooper's Alley L-Head offers the only public boat ramp along the Corpus Christi Bayfront and the floating docks were installed in 2006.
- In 2020, Hurricane Hanna caused severe damage to the entry ramps/floating docks & produced large cracks in the floats.
- The docks received repairs to the entry ramps in 2021 to bring them back into operation but have continued to degrade due to the cracks, heavy use & additional storm damage.

# Location

# Status of Current Floating Docks

# Service Agreement

- The replacement docks will essentially be identical in design, function/specifications to the previous docks & also come from the original manufacturer, Bellingham Marine.
- The scope of the Service Agreement provides for all materials, labor/construction & installation.
- The replacement will require minimal ramp closures with no additional engineering or construction.

2025	2025	2025
March - May	June - July	August
Construction	Delivery/Install	Completion

# Recommendation

---

- Staff recommend approval of the Service Agreement with Bellingham Marine for the replacement of two floating docks in the Corpus Christi Marina at Cooper's Alley L-Head.
