

Parks and Recreation Trestle Trail Project 3/11/26

Trestle Trail Overview

- The project includes the design and construction of a 15-foot-wide shared-use path that will extend from the existing trail on the west side of Oso Bay. The path will run along Division Road to Flour Bluff Drive, then continue along Flour Bluff Drive from Division Road to Don Patricio Road.
 - The project also proposes construction of a pedestrian bridge across Oso Bay, utilizing existing pilings from the former railroad trestle bridge. The bay crossing will create a trail segment approximately 0.67 miles in length.
 - Overall, the project will improve regional trail connectivity and provide a dedicated facility for pedestrians and bicyclists.
-

Trestle Trail Current Status

- Freese & Nichols (FNI) is the engineer, authorized by Council in May 2025
 - Project is currently at 90% design
 - City Engineering, Parks, FBCC and FNI are finalizing small details to move to 100% design
 - Bollards and lighting
-

Trestle Trail Scope

- Construction of the 15-foot trail
 - Lighting improvements
 - Water line installation
 - Parking lot
 - Storm drainage system
 - Updated signage and signalization
 - Future Phase
 - Kayak Launch
 - Fish Cleaning Station
-

Trestle Trail Project Schedule

| 2025 - 2026 | 2026 | 2026 - 2027 |
|---------------------|---------------------|--------------------------|
| June - March | April - July | August - November |
| Design | Bid/Award | Construction |

Project schedule reflects City Council award for design in June 2025 with anticipated construction completion by August 2027
