

# Packery Channel Water Line

Council Presentation  
February 22, 2022

# Project Location

# Project Scope

A brief summary of proposed improvements is as follows:

This project provides for the replacement of approximately 3,000 linear feet of twin 16-inch and a 20-inch waterline with a new 20-inch waterline along Packery Channel.

- Most of the installation of the waterline will be by horizontal direction drilling (HDD) method and a small portion will be installed using conventional trenching method.
- A new gate valve will be installed on the waterline along with an air release valve.

# Project Schedule

2020 - 2021				2022	
January - October	N	D	J	F	March - August
Design	Bid/ Award				Construction

Projected Schedule reflects construction beginning in March 2022 with anticipated completion by August 2022.
