**BACKGROUND :**

Provide an annual report to the City's portion of the Coastal Bend Mitigation Action Plan (CBMAP). The CBMAP is a multi-jurisdictional mitigation action plan that was first adopted in 2006. As a requirement of the plan it must be revised and adopted every five years. The last revision to the plan was in 2011. The current plan will be replaced with a new plan in September 2017.

In addition, The City of Corpus Christi is part of the Community Rating System program. This program provides additional flood insurance savings to policy holders in the Special Flood Hazard Areas based on initiatives the City does to help reduce flood losses. One of the requirements of the program is to update the mitigation action plan annually instead of every five years. To maintain our class rating a presentation for our report must be made on an annual basis to our governing body.
