

# Padre Island Water and Gas Pipeline Extension

Council Presentation  
October 18, 2016

# Project Location

# Project Map

# Project Scope

This project provides for the Padre Island Water and Gas Line Extension from the Aquarius St. to the Sand Dollar Pump Station in the Island.

The work includes professional engineering services for the following elements:

- 18-inch PVC water transmission line
  - ✓ Provides redundant water supply to Padre Island service area
- 8-inch steel gas line
  - ✓ Connects the island to the City's main supply source
- 4-inch MIS conduit for future services
