

Street Preventative Maintenance Program (SPMP)

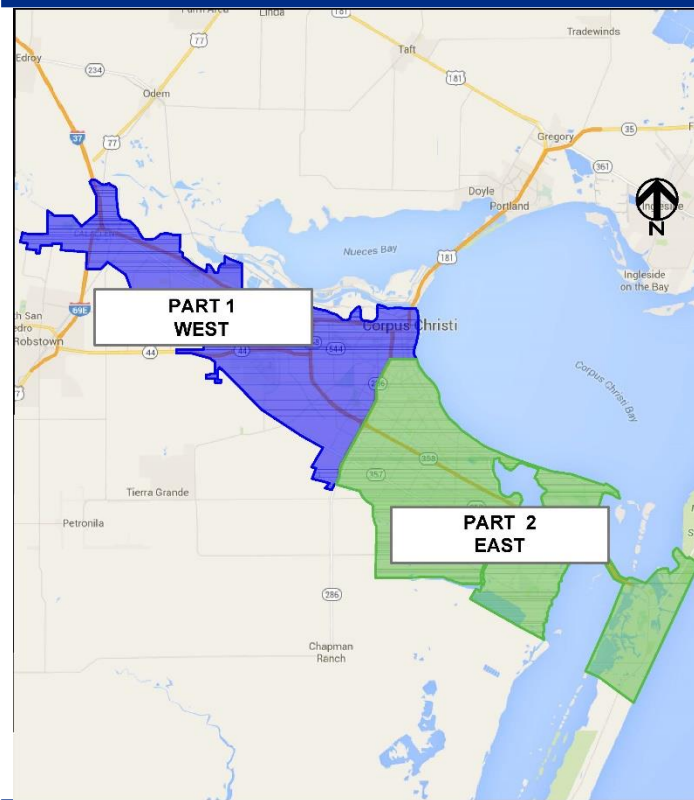

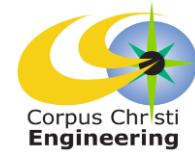

Fiscal Year 2017 – Street Overlays

**Council Presentation
January 24, 2017**

Project Location

Overlays:

- Bid in two parts to increase competition and to increase opportunities for small business
- Developed in 2 parts to increase competition and increase opportunities for small business

Project Scope

This provides for the construction and material testing for the SPMP overlay project (2017-2019). The project includes one base year plus two 1-year optional extensions. Individual delivery orders (DO's) will be prepared for each year. The following is the summary of the overlay project construction:

Two Parts: Part 1 (West), Part 2 (East) with up to 5 DO's for each part. The work includes:

- New HMAC surface layer with milling & replacement of 1-2 inches
- Repairs to the existing HMAC pavement of limestone base, and subgrade as needed
- Limited curb & gutter replacement, and
- Adjustments to utility manhole ring and covers
