F. CITY MANAGER'S COMMENTS / UPDATE ON CITY OPERATIONS:

Mayor McComb referred to City Manager's Comments. City Manager Margie C. Rose reported on the following topics:

a. STATUS OF DROUGHT CONTINGENCY PLAN AND WATER RELEASES

City Manager Margie C. Rose stated that the purpose of this report is to provide an update on the Drought Contingency Plan and Water Releases. Assistant City Manager Mark Van Vleck reported that Lake Corpus Christi is at 100% capacity and the current combined capacity for Choke Canyon Reservoir and Lake Corpus Christi is 51.4%. The City will remain in Stage 1 of the Drought Contingency Plan until there is a combined capacity above 60% for 15 consecutive days. Pass-through targets have been met through a combination of flows over the salt-water barrier in Calallen and the Rincon Bayou Pump Station. There is a surplus of 11,000 acre feet. The November pass-through target is 4,000 acre feet. Two thousand acre feet from this month's surplus can be applied toward half of next month's requirements. Two floodgates are open at Lake Corpus Christi and will remain open for a few more days which will provide additional flooding downstream. Additional flooding downstream could occur should the City receive additional rain in the next few months.

Council members and staff discussed the following topics: an explanation of the credit received from the pass-through of surplus; a future discussion on the terms of the agreed order; whether installation of a pump system at Three Rivers to pump water from Nueces River to Choke Canyon was considered; alternatives to water release requirements; modifications to the Drought Contingency Plan to include Lake Texana in the combined system totals; whether the Drought Contingency Plan inaccurately reflected the amount of available water; the number of water sheds; communications to the public regarding the water index; notification to residents before water is released; and whether wastewater is being pumped into the Rincon Bayou as part of the release requirements.

b. STORM DEBRIS REMOVAL UPDATE

City Manager Margie C. Rose stated that the purpose of this report is to provide an update on the storm debris removal from Hurricane Harvey. Director of Solid Waste Operations Lawrence Mikolajczyk presented the following information: the Multi-Hazard Disaster Debris Management Plan; the debris recovery contract with CrowderGulf; the debris monitoring contract with Tetra Tech; the debris management sites; the current storm brush collection areas; photographs of the challenges impacting debris collection; and the second/final collection sweep.

Council members and staff discussed the following topics: completion dates of the final sweep; areas in the City where debris was not been collected in first sweep; how areas to begin the debris collection process were determined; the contact information to provide to the public to report where collection has not occurred; the reason that only half a street would have been addressed; collection of debris blocked by vehicles; comments from council members commending the Solid Waste Department for their work on storm debris removal; clarification on press releases related to debris removal; and future consideration to require contractors that are trimming trees after a storm to remove and haul away the limbs that are trimmed.
