Master Service Agreement – Citywide Storm Water Infrastructure Rehabilitation / Replacement	
<u>Council Meeting Dates:</u> Future Item – June 12, 2018 Action Item - June 19, 2018	<u>Item Being Considered:</u> Motion

RECOMMENDATION:

Authorization to award a contract with LJA Engineering of Corpus Christi, Texas for a not to exceed amount of \$500,000 to develop and implement the Citywide Storm Water Infrastructure Rehabilitation/Replacement project.

SUMMARY:

This project continues implementation of a strategy to systematically rehabilitate and/or replace aging storm water infrastructure city-wide. It includes evaluation, prioritization, and hydraulic modeling of storm water infrastructure to develop construction strategies and methodologies to reduce flooding and maintenance costs. Preparation of the IDIQ construction documents to implement recommended improvements through multiple Delivery Orders (DO's) "work orders" is also included. The DO's will be prepared by the engineer and issued to the contractor based on the contractor's unit bid prices. There may be some projects that cannot be completed through the IDIQ process; these projects may be designed and bid separately.

This MSA contract provides the basic scope, terms, and conditions that govern future Task Orders, which will be issued with specific scope of work and associated fees. The total Task Orders will not exceed the MSA contract value and will be administratively authorized by the City Manager or designee. LJA Engineering was selected by RFQ 2016-01.

PREVIOUS COUNCIL / BOARD ACTIONS:

None.
