

July 9th, 2018

Robert Rocha, Chief
Corpus Christ Fire Department
2406 Leopard, Suite 300
Corpus Christi, Texas 78408

Chief Rocha,

On behalf of the leadership of the Texas Emergency Medical Task Force, I would like to congratulate your department on the successful application to house one of the two new AMBUS units. Our Executive Committee considered all the applications made by Fire and EMS Departments from across the State of Texas and feel that Corpus Christi would be ideally suited to provide a tactical advantage to the EMTF Program based on its geographic location and operational capability to provide trained personnel to respond to incidents on behalf of the Program. Of course, this offer is contingent upon your Department's continued participation with the Texas EMTF Program, as well as execution of an agreement with the Coastal Bend Regional Advisory Council / EMTF 11 regarding resource placement, participation requirements, and deployment expectations.

The AMBUSs have been an incredibly valuable resource for the State and this program has been a foundation of the Emergency Medical Task Force Program since its inception. I am excited about bringing the "AMBUS 2.0" to Texas and welcoming the Corpus Christi Fire Department to the AMBUS family.

Please sign below and return to the Texas EMTF State Coordinating Office to accept this offer and finalize the selection process.

Sincerely and Respectfully,

Eric Epley, CEM
Program Director, Texas Emergency Medical Task Force
Executive Director, Southwest Texas Regional Advisory Council

I accept the offer above on behalf of the Corpus Christi Fire Department and the City of Corpus Christi.

Robert Rocha, Chief
Corpus Christi Fire Department
