

# Restoring Winter Quarter Averaging

City Council  
October 16, 2018

# Wastewater Rate

---

- Current wastewater rate for residential customers is based on actual water usage (effective January 1, 2018)
  - Previously, a winter quarter average was used to determine residential wastewater rates
  - Repeal current wastewater rate and go back to most recent winter quarter average for residential customers during 2017
  - New residential customers that do not have a winter quarter average would be charged for 3,000 gallons
-

# Wastewater Rate Summary

---

## RESIDENTIAL – Inside City Limits

	2016 and 2017 (Winter Qtr. Ave.)	CURRENT (Water Use)	PROPOSED (Winter Qtr. Ave.)
Minimum charge – first 2,000 gallons	\$34.03	\$32.60	\$34.03
Per 1,000 up to 25,000	\$6.69	-----	\$6.69
2,000 – 6,000 gallons		\$ 3.25	
6,001 – 15,000 gallons		\$ 4.85	
15,001 – 25,000 gallons		\$ 7.25	

# Recommendations

---

- Continue with current wastewater rate structure and continue collecting and analyzing data
- Create advisory board or commission to focus on utility rates and charges
