December 10, 2019

I, Gamaliel Oliva, am appealing the decision made on November 21, 2019 by the Corpus Christi Electrical Advisory Board. The decision was a 6 month suspension of the electrical contractor license for my company, Lamp Lighter Electrical Contractor, in the city of Corpus Christi. In 37 years of business, Lamp Lighter has never had any violations or offenses with regards to licensing or other such matters. Since this is the first offense, and the ramifications of a 6 month suspension would lose 75% of our business, a lesser penalty of probation is being requested at this time, with a further infraction resulting in a suspension would appear fair. At the time of the hearing, I do not feel I had the opportunity to adequately defend against the accusations made at the time. The persons mentioned in the hearing were not all performing electrical work and those persons whose licenses were expired at the time have since been renewed and current. Additionally, prior to the hearing, no advance notice of a judgment with an immediate effect as a result was mentioned. This would have allowed time for Lamp Lighter and its customers of potential ramifications from the decision of this hearing to adequately prepare. Thank you for your time and consideration.

Gamaliel S. Oliva
