ATTACHMENT A: SCOPE OF WORK

1. **General Requirements**

The Contractor shall mow storm water street right-of-way's in accordance with the Storm Water Department's maintenance operations of the Storm Water Drainage Collection System. All areas are located within the City limits of the City of Corpus Christi. Please reference Exhibit 1, Padre Island.

2. **Scope of Work**

- A. Prior to each operation, the Contractor shall remove all litter and debris, including paper, cans, bottles, bags, grass clippings, accumulated leaves, palm fronds, and other tree litter including tree limbs from the identified locations. Including, but not limited to, fence lines, sidewalks, trees, shrubs, groundcover beds, all curbs and gutters, and other hard surfaces within the identified location. Pick-up shall consist of removal of visible litter larger than three inches square. Special attention shall be given to ensure the removal of objects, which may cause injury, if thrown from equipment.
- B. Mowers shall be adjusted for a cutting height of approximately five inches.
- C. Cycle Description:
 - 1. Street Right-of-Way and fire breaks - 8 Cycles per year.
 - 2. Street Right-of-Way cycles will run 45 days. If a cycle is finished before the days are up, the Contractor will not start another cycle until the day after the completion of the previous cycle.
 - 3. There will be only 8 cycle cuts for street right-of-way in a contract year. Contractor will notify the Contract Administrator upon completion of mowing for a cycle.
- D. All mowing equipment shall be equipped with sharp blades so as not to tear, but cleanly cut the blades of grass.
- E. The Contractor shall mow as close as practicable to all fixed objects exercising extreme care not to damage trees, plants, shrubs, fire hydrants, sign and power poles, guardrails, culvert head walls, delineators or other appurtenances which are part of the right-of-way.
- F. The Contractor shall hand trim around all fixed objects such as trees, plants, shrubs, fire hydrants, sign and power poles, guardrails and culvert head walls, unless specified otherwise and will be subsidiary to the mowing operation.
- G. The Contractor shall be responsible for notifying the Contract Administrator of large object(s), including, but not limited to furniture, appliances and massive dump sites etc. Any large object(s) which are too large to set aside, shall be mowed around until removal is coordinated by the City.

The Contractor shall coordinate the rescheduling of mowing the uncut area with the Contract Administrator.

- H. After operations, the Contractor shall remove any visible trash and debris that were cut up during the process. The Contractor shall not dispose of any trash or debris into dumpsters located on City property. The trash and debris must be removed from City property and disposed of in accordance with all City ordinances. All trash and litter shall be disposed of properly at the Contractor's expense and proof of such proper disposal through third party invoices or landfill receipts shall be turned in to the Contract Administrator on a monthly basis.
- I. Emergency Mobilization: Under extraordinary conditions, the City may be required to pull the Contractor from an area actively being worked in order to address an emergency situation. The City recognizes this may create a hardship for the Contractor in terms of equipment and personnel costs. Under such authorized emergency mobilizations, the Contract Administrator will authorize the Contractor to charge no more than \$75.00 for fuel for each piece of equipment and \$50.00 per person, not to exceed \$250.00 for labor and equipment in addition to the standard contracted rate for acreage mowed. An "authorized" emergency mobilization is a mobilization initiated by the Contract Administrator. Any unauthorized emergency mobilizations will not be paid for by the City. In addition, the event of an authorized emergency mobilization does not relieve the Contractor of its obligation to maintain the contracted mowing schedule.
- J. Drought Stipulation: The City intends on establishing a routine scheduled right-of-way mowing program which will control the growth of grass and weeds to an acceptable level. However, the lack of rainfall throughout the contract period may slow the growth of grass and weeds to a level which does not require mowing of the rights- of-way at the predetermined scheduled dates. In the event a drought situation develops at any time throughout the contract period, the Contract Administrator will consult with the Director of Public Works Operations or designee and in turn will direct the Contractor to either continue mowing, mowing on a limited basis or suspend mowing altogether. Cycles which are canceled due to drought conditions will not be made up.

3. Work Site and Conditions

- A. The work shall be performed at locations throughout the City as defined by group. See Exhibit 1 for locations.
- B. Contractor shall supply the City with a work schedule to indicate the normal starting and completion times for its operations.
- C. Work Hours: The Contractor will confine all operations to daylight hours, sunrise to sunset and the schedule must be approved by the Contract Administrator prior to commencing the mowing program. It is expected that the work will be scheduled effectively throughout the contract period in order to accomplish an overall well managed mowing maintenance program.

- D. Non-Work Hours: The Contractor may not store any equipment or tools on any site. After completion of work at any site, the Contractor must remove all equipment, supplies, and materials from that site.
- E. Mowing will not be permitted when, in the opinion of the Contract Administrator, Soil and weather conditions are such that the rights-of-way will be damaged. Cycles which are canceled due to rainfall will be made up only if needed, as decided by the Contract Administrator. The Contractor will coordinate rescheduling of make-up cycles with the Contract Administrator.
- F. For Ozone Warning Days the following restrictions apply:
 - 1. No use of chain saws, pole saws, motor scooters and other small engines will be allowed.
 - 2. Diesel powered trimming equipment will be allowed to operate on the second day of back-to-back Ozone Action Days if equipment is labeled stating the type of fuel used and the Contractor has made contact with the Contract Administrator or designee and received permission to proceed with work order.
 - 3. Equipment using reformulated gas will be allowed to operate on the third day of back-to-back Ozone Action Days if equipment is labeled stating the type of fuel used and the Contractor has made contact with the Contract Administrator, or designee and received permission to proceed with work order.

4. Contractor Quality Control and Superintendence

The Contractor shall establish and maintain a complete Quality Control Program that is acceptable to the Contract Administrator to assure that the requirements of the Contract are provided as specified. The Contractor will also provide supervision of the work to insure it complies with the contract requirements.

5. Traffic Control

Maximum cutting widths for rigid frame rotary mowers shall be 108 inches. Hinged or batwing mower cutting widths shall be max. of 15 feet. Slope mowers to have 72 inches cutting width and 28 foot or greater cutting reach. All mowers shall be kept in good operating condition and shall always be maintained to provide a clean sharp cut of vegetation. All equipment shall be approved by the Contract Administrator.

C. Contractor shall have sufficient resources and personnel to perform the work as specified.

Signs, sign stands, safety flags, and all other safety materials or devices as well as safety vests will be required to protect the trimmers and the traveling public and will be furnished by the Contractor. The Contractor will be responsible for the maintenance or replacement of these items as necessary. If at any time work is in progress, the traffic control devices do not accomplish the intended purpose due to weather or other conditions affecting the safe handling of traffic, the Contractor shall immediately make necessary changes there to correct the unsatisfactory conditions. These provisions for directing traffic will not be paid for directly but shall be subsidiary to the various bid items of this contract.

2. All damages which are not repaired or compensated for by the Contractor will be repaired or compensated for by City forces at the Contractor's expense. All expenses charged by the City for repair work or compensation shall be deducted from any monies owed to the Contractor.

9. Notifications and Inspections

- A. Each Monday morning prior to 8:00 a.m., the Contractor shall call or email the assigned Contract Administrator indicating the locations and work being performed that week. No work shall be done without proper, prior notification.
- B. When a location is completed, the assigned City Inspector shall inspect the site and either approve the work or advise the Contractor of any discrepancies. The Contractor shall take whatever action necessary to correct any discrepancies within one working day. The Contract Administrator shall then make another inspection and if the discrepancies have not been corrected, the Contractor will be notified, and a \$25 re-inspection fee will be charged for a third inspection. At

that time, the Contractor shall have one working day to complete the work. If the discrepancies still have not been corrected, the Contractor will be notified to correct the discrepancies and a \$25 fee will be charged for each additional inspection necessary until discrepancies have been corrected. The City shall deduct the inspection fee from the payment to be made to the Contractor for that cycle of maintenance.

- C. The City shall always have the right to examine the supplies, materials and equipment used by the Contractor, its subcontractors, agents, and employees.
- D. Work Crew Supervision: The Contractor shall provide qualified supervision of each crew, always while working under this Contract.
