Looking at what works the best in flooded areas (FEMA document), working on getting the word out to city staff, met with Councilman Suckley, have his support.

Next steps: need to pin down max drainage slopes, eventually would like full ISAC support, forward a city a recommendation, and meet with builders to discuss.

Maybe 350-500 infill lots.

Michael Dice: discussed a limit of fill, open to having stakeholder meetings, now that we have builders using stemwall it's a good argument to make

BC: haven't spoken to builders yet, but in the past they have been reticent to change the UDC

Craig Thompson: what is a stemwall? Have we heard the builders out? Can we bring them in and ask them what their objections are to the stemwall?

BC: to send photos to Bonnie for presentation (next ISAC meeting)
